The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in

the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army–Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the “Turning the Tide” project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

The emergence of the internet and developments in educational software have changed the way teachers teach and the way students learn. There has been a substantial increase in the quantity, quality, and diversity of educational material available over the internet or through the use of satellite video and audio linkups. These technologies have allowed new learning methods and techniques to reach a greater geographic region and have contributed to the global transformation of education. The Roles of Technology and Globalization in Educational Transformation is an essential academic book that provides comprehensive research on issues concerning the roles of technology and globalization in educational transformation and the challenges of teaching and learning in various cultural settings and how they were resolved. It will support educational organizations that wish to find, create, or adapt technology for use in their institution. Featuring a broad range of topics such as public administration, educational technology, and higher education, this book is essential for teachers, deans, principals, school administrators, IT specialists, curriculum developers, instructional designers, higher education staff, academicians, policymakers, researchers, and students.

From the bright lights of London's Holland Park into the power cuts and very rural life of Lagos state in Nigeria, all in the blink of an eye. This is the true story of a family torn apart by International Parental Child Abduction. In September 1973, Yemi was just seven years old when he and his younger sister were taken away from England by their dad without their mum's knowledge or consent. They lived and grew up in Nigeria for over fourteen years, where the only communication they had with their mum was by letters. Without social media, computers or mobile phones, how does a mother track down her missing children? How do the children adapt to the sudden change of lifestyle? This is the story of the events through the eyes of that seven-year-old child, from the moment he realised he was in a different country. Yemi relates the stark change of culture, the new family and the voyage of self-discovery. The book covers his roller-coaster young life of apprehensions and ecstasy, his rebellions, and his loves. It follows his anger as he grew from boy to teenager and his eventual reconciliation with himself and his parents. What kind of man would that boy grow up to be? Time Will Tell. Featured in The Bookseller

This book gathers high-quality research papers presented at the 2nd AUE international research conference, AUEIRC 2018, which was organized by the American University in the Emirates, Dubai, and held on November 13th-15th, 2018. The book is broadly divided into two main sections: Sustainability and Smart Business, and Sustainability and Creative Industries. The broad range of topics covered under these sections includes: risk assessment in agriculture, corporate social responsibility and the role of intermediaries, the impact of privatizing health insurance, political events and their effect on foreign currency exchange, the effect of sustainable HR practices on financial performance, sustainability integration in the supply chain and logistics, gender inequality in the MENA economies, the panel data model, the model of sustainable marketing in the era of Industry 4.0, micro-enterprises as a tool for combating unemployment, the impact of financial education and control on financial behavior, measuring financial and asset performance in agricultural firms, a comprehensive strategic approach to sustainability in the UAE, sustainability and project finance, HR analytics, FaD or fashion for organizational sustainability, a conceptual framework of sustainable competitive advantages, psychology of organizational sustainability, Blockchain technology and sustainability, veganism and sustainability, institution building from an emotional intelligence perspective, sustainable concrete production using CWP, occupants' behavior and energy usage in Emirati houses, the effect of shop lighting on consumer behavior, multimedia applications in digital transformation art, integrating biomimicry principles in sustainable architecture, experimental sustainable practices in fashion education, technology-assisted student-centered learning for civil engineering, and a 10-step design process for architectural design studios. All contributions present high-quality original research work, findings and lessons learned in practical development.

A rare and timely intervention from Kingsley Chiedu Moghalu, Deputy Governor of the Central Bank of Nigeria, on development in Africa. To many, Africa is the new frontier. As the West lies battered by financial crisis, Africa is seen as offering limitless opportunities for wealth creation in the march of globalization. But what is Africa to today's Africans? Are its economies truly on the rise? And what is its likely future? In this pioneering book, leading international strategist Kingsley Moghalu challenges conventional wisdoms about Africa's quest for growth. Drawing on philosophy, economics and strategy, he ranges from capitalism to technological innovation, finance to foreign investment, and from human capital to world trade to offer a new vision of transformation. Ultimately he demonstrates how Africa's progress in the twenty-first century will require nothing short of the reinvention of the African mindset. 'Africans seriously analyzing Africa's opportunities are all too rare. Kingsley Moghalu writes with insight and authority' Paul Collier 'Savvy . . . distinguished' Mark Malloch-Brown 'Unique in the depth of its insight, the ambition of its scope, and the clarity of its argument. Kingsley Moghalu brings a remarkable intellect and his vast experience to this tour de force on Africa's economic transformation. This is a truly weighty contribution to understanding Africa's developmental dilemma and its quest for a more prosperous future' Ngozi Okonjo-Iweala 'Insightful and analytical . . . sheds instructive light on Africa's position in the world. It is a testament to the palpable optimism that encompasses Africa while frankly addressing the myriad challenges that lie ahead for its economic transformation' Shashi Tharoor Kingsley Chiedu Moghalu is Deputy Governor of the Central Bank of Nigeria. He was the Founder and CEO of Sogato Strategies S.A., a global strategy and risk management consulting firm in Geneva, Switzerland. He has previously worked for the United Nations for 17 years in strategic planning, legal, development finance and executive management. His previous books include Global Justice and Rwanda's Genocide.

This book will appeal not only to historians and geographers, but to many who maintain a deep interest in the British countryside and its past, and to those who continue to share a fascination for the Second World War, in particular the 'home front'. It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago.
