It seems, at first glance, like an obvious step to take to improve industrial productivity: one should simply watch workers at work in order to learn how they actually do their jobs. But American engineer FREDERICK WINSLOW TAYLOR (1856-1915) broke new ground with this 1919 essay, in which he applied the rigors of scientific observation to such labor as shoveling and bricklayer in order to streamline their work... and bring a sense of logic and practicality to the management of that work. This highly influential book, must-reading for anyone seeking to understand modern management practices, puts lie to such misconceptions that making industrial processes more efficient increases unemployment and that shorter workdays decrease productivity. And it laid the foundations for the discipline of management to be studied, taught, and applied with methodical precision.

The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: Each chapter starts with a To Do list. It gives the central idea of the chapter and the way it has been addressed. Each chapter is divided into several sections corresponding to different components of the syllabus. Each chapter is splashed with HOTS. This is to promote clarity of the basics. Focus Zones in each chapter present a crux of the concepts. Blocks in each chapter include matter of special significance. Power Points and Revision Window offer a quick glance of the subject matter. [Exercise] is tuned to the pattern of examination. Answers to important questions focus on the technique of writing. The exercise includes: objective type questions (remembering & understanding based questions), divided into five sections: (a) multiple choice questions, (b) fill in the blanks, (c) true or false, (d) matching the correct statements, (e) [very short answer] objective type questions reason-based questions HOTS & applications analysis & evaluation CBSE questions (with answers or reference to the text for answers) NCERT questions (with hints to answers) miscellaneous and add-on questions (with hints or reference to the text for answers) Dos and Don'ts (at the end of each chapter) should serve as a safeguard against misinterpretation of the concepts. Ability Zone is a uniquely designed section at the end of the chapter. This raises the difficulty level, of course, but should serve as a useful material for the outstanding learners. Solved & Unsolved numericals are given to boost a grip on the subject.

"This inspiring story introduces Ron, an average guy, who is increasingly disturbed by social media updates from his peers and feels he is not doing as well in his own life. He feels stuck in his day-to-day routine and is struggling to accept if that is all life had to offer, after all the hard work that he put in over the years to establish himself. Although his life is comfortable, he feels something is missing within the entire scheme of things. One day, through a [magical meeting], he is introduced to the step-by-step approach to finding one's answers. Ron embarks on this journey, becomes his best self and in the process, discovers his life purpose, a sense of passion and ever-lasting contentment. The book offers those key concepts from the science of achievement and personal development that can have maximum impact on your life. In addition, simple exercises have been provided, each of which can be integrated into your busy day-to-day lives. If you are new to self-help and personal development, this book will provide you with most of what you need to become your best self and continue pushing further. If you are already a self-help enthusiast, this book will serve as a quick reminder of the core principles and high-impact exercises."
