Questions concerning safety in aviation attract a great deal of attention, due to the growth in this industry and the number of fatal accidents in recent years. The aerospace industry has always been deeply concerned with the permanent prevention of accidents and the conscientious safeguarding of all imaginable critical factors surrounding the organization of processes in aeronautical technology. However, the developments in aircraft technology and control systems require further improvements to meet future safety demands. This book embodies the proceedings of the 1997 International Aviation Safety Conference, and contains 60 talks by internationally recognized experts on various aspects of aviation safety. Subjects covered include: Human interfaces and man-machine interactions; Flight safety engineering and operational control systems; Aircraft development and integrated safety designs; Safety strategies relating to risk insurance and economics; Corporate aspects and safety management factors --- including airlines services and airport security environment.

TRB's Airport Cooperative Research Program (ACRP) Report 62: Airport Apron Management and Control Programs explores the effectiveness of apron management programs around the world.

"The AHM is a field-reference publication that contains recommended industry standards and procedures covering airside safety, load control, baggage, cargo and mail handling, aircraft movement control, aircraft loading, departure control systems, functional requirements for ground support equipment, an extensive listing of aircraft doors and ground servicing points by aircraft type, as well as the latest IATA Standard Ground Handling Agreement (SGHA) amendments. The AHM is published annually in English only. The AHM is your definitive source for the latest industry-approved policies and standards covering all facets of safe and efficient airport operations." -- Publisher's website.

This volume looks at the operational standards and obligations in civil aviation, and the consequences of failure to comply with them. It covers a wide range of topics both international and complex in measure.
