New extended matching questions and answers closely following the PLAB syllabus.

As the first in the 'Clinical Talk' series, the philosophy of this book is to have a set of question-based sections to help a final-year medical student prepare for exams. These sections include multiple choice questions (MCQs), extended matching questions (EMQs) and case studies. The idea is to have not just a 'test yourself' book, but one which students can work through as a learning exercise as well as for revision purposes. For that reason, the answers and explanations provided here are just as important as the questions themselves. Stansby and Goldberg have structured this book such that it complements one of their bestselling textbooks,

This revision book has been put together with the aim of helping dental students pass their exams. It is also beneficial in preparation for popular post graduate exams such as MJDF, MFDS and ORE. The book is a collection of the most popular questions dental students are asked during different examinations in dental schools. Questions are clearly worded and each question has a concise, yet informative answer. The questions and answers are designed to help students memorise key concepts that are frequently asked in dentistry examinations. The book is divided into a series of main topics, making it easier to navigate and focus on each area as students go through revision.
