aquaculture systems

(RAS) typically

consist of advanced

indoor, tank-based

systems in which fish

are grown under very

controlled conditions.

The technology

Download Free Aquaculture

utilises mechanical and biological filters to reuse the water, passing it through treatment processes to remove organic waste and keep the high water quality intact.

~~RAS – recirculating
aquaculture systems |
BioMar~~

Recirculating

Download Free Aquaculture

Recirculation aquaculture systems are used in home aquaria and for fish production where water exchange is limited and the use of biofiltration is required to reduce ammonia toxicity. Other types of filtration and environmental control are often also necessary to maintain clean water and

Download Free Aquaculture

provide a suitable habitat for fish. The main benefit of RAS is the ability to reduce the need for fresh, clean water while still maintaining a healthy environment for fish. To be operated economically commercially
