Wolfgang Demtröder. This introduction to Atomic and Molecular Physics explains how our present model of atoms and molecules has been developed over the last two centuries both by many experimental discoveries and, from the theoretical side, by the introduction of quantum physics to the adequate description of micro-particles.

We are pleased to announce the 14th European Conference on Atoms Molecules and Photons (ECAMP14) in Vilnius, Lithuania, June 27- July 1, 2022. The triennial ECAMP conference series, launched in 1981, is the major conference of the Atomic, Molecular and Optical Physics Division (AMOPD) of the European Physical Society (EPS). We hope that you will also take some time to enjoy our social programme and some of Vilnius' unsurpassed attractions.

Photons interact with matter because matter contains electric charges. The electric field of light exerts forces on the electric charges and dipoles in atoms, molecules, and solids, causing them to vibrate or accelerate. Conversely, vibrating electric charges emit light. Atoms, molecules, and solids have specific allowed energy levels determined by the rules of quantum mechanics.

Welcome. We are pleased to announce the 13th European Conference on Atoms Molecules and Photons (ECAMP13) in Florence, Italy, April 8-12, 2019. The Conference venue will be Fortezza da Basso in the very heart of the renaissance town. The triennial ECAMP conference series, launched in 1981, is the major conference of the Atomic, Molecular and Optical Physics Division (AMOPD) of the European Physical Society (EPS).
