collaboration with Holmgren, and in 1978 they published their book Permaculture One, which introduced this design system to ...

Concepts and themes in design; Methods of design; Pattern understanding; Climatic factors; Trees and their energy transactions; Water; Soils; Earthworking and earth resources; The humid tropics; Dryland strategies; Humid cool to cold climates; Aquaculture; The strategies of an alternative global nation.

Topics in this book include: Energy-efficient site analysis, planning & design methods. House placement & design for temperate, dryland & tropical regions. Urban permaculture: garden layouts, land access & community funding systems. Using fences, trellis, greenhouse & shadehouse to best effect. Chicken & pig forage systems; tree crops & pasture integration for stock. Orchards & home woodlots for temperate, arid & tropical climates. How to influence microclimate around the house & garden. Large section on selected plant species lists, with climatic tolerances, heights & uses.

The Basics of Permaculture Design, first published in Australia in 1996, is an excellent introduction to the principles of permaculture, design processes, and the tools needed for designing sustainable gardens, farms, and larger communities. Packed with useful tips, clear illustrations, and a wealth of experience, it guides you through designs for gardens, urban and rural properties, water harvesting systems, animal systems, permaculture in small spaces like balconies and patios, farms, schools, and ecovillages. This is both a do-it-yourself guide for the enthusiast and a useful reference for permaculture designers.

Learn how to fill forests with food by viewing agriculture from a remarkably different perspective: that a healthy forest can be maintained while growing a wide range of food, medicinal, and other nontimber products. The practices of forestry and farming are often seen as mutually exclusive, because in the modern world, agriculture involves open fields, straight rows, and machinery to grow crops, while forests are reserved primarily for timber and firewood harvesting. In Farming the Woods, authors Ken Mudge and Steve Gabriel demonstrate that it doesn't have to be an either-or scenario, but a complementary one; forest farms can be most productive in places where the plow is not: on steep slopes and in shallow soils. Forest farming is an invaluable practice to integrate into any farm or homestead, especially as the need

for unique value-added products and supplemental income becomes increasingly important for farmers. Many of the daily indulgences we take for granted, such as coffee, chocolate, and many tropical fruits, all originate in forest ecosystems. But few know that such abundance is also available in the cool temperate forests of North America. *Farming the Woods* covers in detail how to cultivate, harvest, and market high-value nontimber forest crops such as American ginseng, shiitake mushrooms, ramps (wild leeks), maple syrup, fruit and nut trees, ornamentals, and more. Along with profiles of forest farmers from around the country, readers are also provided comprehensive information on:

- historical perspectives of forest farming;
- mimicking the forest in a changing climate;
- cultivation of medicinal crops;
- cultivation of food crops;
- creating a forest nursery;
- harvesting and utilizing wood products;
- the role of animals in the forest farm;
- and, • how to design your forest farm and manage it once it ' s established.

Farming the Woods is an essential book for farmers and gardeners who have access to an established woodland, are looking for productive ways to manage it, and are interested in incorporating aspects of agroforestry, permaculture, forest gardening, and sustainable woodlot management into the concept of a whole-farm organism.

The Permaculture Way shows us how to consciously design a lifestyle which is low in environmental impact and highly productive. It demonstrates how to meet our needs, make the most of resources by minimizing waste and maximizing potential, and still leave the Earth richer than we found it.
