It is 809 AD in Baghdad, the capital of the 'Abbasid Empire. The famed Caliph Harun al-Rashid has died. His successor, al-Amin, son of his Hashemite Arab wife, had promised the Caliph that he would appoint his half-brother al-Ma'mun, born to a slave mother, as his heir apparent. But al-Amin appoints his own son instead. This betrayal provides an opening for the Persians to help the statesmanlike and brilliant al-Ma'mun, whom they consider one of their own, to challenge his fickle brother. Against the backdrop of this war of succession, the novel weaves parallel love stories, political intrigue and machinations, nobility and treachery, spies and counterspies. Behzad, a famous doctor with an agenda all his own, is deeply in love with the beautiful Maymuna: both are members of Persian families persecuted by the 'Abbasid house. But the son of al-Amin's vizier is also enamored with Maymuna and wants to marry her. At the center of these tangled webs is al-Amin's mysterious Chief Astrologer, whose true identity and loyalties remain unknown even to the Caliph and his court. He not only divines the future but also shapes it by changing the course of the war between the brothers—a war from which the 'Abbasid Empire never recovered. What will become of the lovers? Who will survive and who will perish? The fast-paced action and suspense leave us guessing to the very end.

A soldier and statesman for the ages, the Duke of Wellington is a towering figure in world history. John Severn now offers a fresh look at the man born Arthur Wellesley to show that his career was very much a family affair, a lifelong series of interactions with his brothers and their common Anglo-Irish heritage. The untold story of a great family drama, Architects of Empire paints a new picture of the era through the collective biography of Wellesley and his siblings. Severn takes readers from the British Raj in India to the battlefields of the Napoleonic Wars to the halls of Parliament as he traces the rise of the five brothers from obscurity to prominence. Severn covers both the imperial Indian period before 1800 and the domestic political period after 1820, describing the wide range of experiences Arthur and his brothers lived through. Architects of Empire brings together in a single volume a grand story that before now was discernible only through political or military analysis. Weaving the personal history of the brothers into a captivating narrative, it tells of sibling rivalry among men who were by turns generous and supportive, then insensitive and cruel. Whereas other historians have minimized the importance of family ties, Severn provides an unusually nuanced understanding of the Duke of Wellington. Architects of Empire casts his career in a new light—one that will surprise those who believe they already know the man.

The Seleukids, the easternmost of the Greek-speaking dynasties which succeeded Alexander the Great, were long portrayed by historians as inherently weak and doomed to decline after the death of their remarkable first king, Seleukos (281 BC). And yet they succeeded in ruling much of the Near and Middle East for over two centuries, overcoming problems of a multi-ethnic empire. In this book an international team of young, established scholars argues that in the decades after Seleukos the empire developed flexible structures that successfully bound it together in the face of a series of catastrophes. The strength of the Seleukid realm lay not simply in its vast swathes of territory, but rather in knowing how to tie the new, frequently non-Greek, nobility to the king through mutual recognition of sovereignty.
