Recent developments in direct taxes and VAT/GST Taxes - in general - have become the topic of broad

legal and policy discussions. VAT and GST are often said to be the fiscal success story of the 20th century, as almost all developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes

should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing, European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The

contributions in this book make a legal comparison of the recent developments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.

This critical account of the fair trade movement explores the vast gap between the rhetoric of fair trade and its practical results for poor countries, particularly those of Africa. In the Global North, fair trade often is described as a revolutionary tool for transforming the lives of

millions across the globe. The growth in sales for fair trade products has been dramatic in recent years, but most of the benefit has accrued to the already wealthy merchandisers at the top of the value chain rather than to the poor producers at the bottom. Ndongo Sylla has worked for Fairtrade International and offers an insider's view of how fair trade improves—or doesn't—the lot of the world's poorest. His methodological framework first describes the hypotheses on which the fair trade movement is grounded before going on to examine critically the claims made

by its proponents. By distinguishing local impact from global impact, Sylla exposes the inequity built into the system and the resulting misallocation of the fair trade premium paid by consumers. The Fair Trade Scandal is an empirically based critique of both fair trade and traditional free trade; it is the more important for exploring the problems of both from the perspective of the peoples of the Global South, the ostensible beneficiaries of the fair trade system.

This report sets out the most significant reforms to tackling re-offending and

managing offenders in the community for a generation. Consistently high re-offending rates have led to the radical overhaul with almost half of all prison-leavers reoffending within 12 months - for those serving less than a year that figure rises to almost 58 per cent. For the first time all offenders, including those serving less than 12 months, will be subject to mandatory supervision and tailored rehabilitation on release from prison. Further plans include: a greater use of mentors to meet offenders at the prison gate and support them in the community; only

paying in full for services that are proven to work at reducing re-offending; and opening up rehabilitation services to a much wider range of providers, who are free to innovate and do the things that work to turn offenders' lives around. What we do at the moment is send people out of prison with £46 in their pocket, and no support at all. The proposals will see all of those sentenced to prison or probation properly punished while being helped to turn away from crime for good. They will also mean taxpayers' money is only spent on what works when it comes to cutting crime.

These proposals build on a consultation from last year which set out plans to open up rehabilitation services to the private and voluntary sector to drive innovation through the criminal justice system and increase the use of Payment by Results
