Changing Eating Behaviour Broadening Social Marketing By

On the 26th June 2012 the Foundation held its 45th anniversary conference entitled Behaviour change in relation to healthier lifestyles. This featured expert speakers in areas of behavioural science, weight control, physical activity, eating behaviour and a number of case studies to show how behaviour can be changed for the better in practice.

Behaviour change - British Nutrition Foundation

A major determinant of human eating behavior is social modeling, whereby people use others' eating as a guide for what and how much to eat. We review the experimental studies that have independently manipulated the eating behavior of a social referent (either through a live confederate or remotely) and measured either food choice or intake.

Social modeling of eating: A review of when and why social ...

Eating behaviour is strongly influenced by social context. We eat differently when we are with other people compared with when we eat alone. Our dietary choices also tend to converge with those of our close social connections. One reason for this is that conforming to the behaviour of others is adaptive and we find it rewarding.

Social influences on eating - ScienceDirect

Similarly an intervention study using videos to change eating behaviour reported that rewarding vegetable consumption increased that behaviour (Lowe et al., 1998). The relationship between food and rewards, however, appears to be more complicated than this.

Children's eating attitudes and behaviour: a study of the ...

However, we know that a key to reducing obesity is changing behaviour. Some of this will come from government and the local environment, making it easier for people to change - like providing information on affordable healthy eating and making it easier to be physically active whether at home or at work.

Small Changes, Big Gains! - British Nutrition Foundation

how to affect behavioural change in a systematic and sustainable way at population levels. Therefore, there is a call for additional research in order to identify the alternative ways of changing dietary behaviours. Healthy eating is a target behaviour of social marketing, which is a

HEALTHY EATING BEHAVIOUR

Do allow yourself to eat a range of foods without forbidding yourself a particular food. Do give yourself encouragement. Do look for a support person to help you stay motivated and accountable. Do be gentle with yourself! Try not to beat yourself up when you lapse. Do think of eating healthfully as a lifestyle change. Do use the scale mindfully.

Food Psychology: Understanding Eating Behavior & Habits

"Healthy life 'can give you another 14 years'" according to a headline in The Daily Telegraph.The report underneath explains that "four healthy behaviours - not smoking, exercising, alcohol intake of less than 15 units per week (less than five large glasses of wine or five pints of medium-strength lager) and having vitamin C levels equivalent to eating five servings of fruit and ...

Healthy behaviours extend life - NHS

What we need is for enough of us to do so. If 25 percent of us change our behavior and publicize making this change to friends, neighbors, and family members we can shape social norms more ...

Changing Social Norms in the Time of a Pandemic ...

Changes in consumer eating habits, seen in the patterns of eating-out and eating at hawker stalls are rapidly becoming the hallmark of an urban lifestyle (Hafiz, 2005). This study finding shows an almost equal result of our study, (40%) of participants took junk food in the frequency of three times per week compared to the same variables result conducted by Ganasegaran et al (2012) with the outcome of (42.4%).

PSYCHOLOGICAL FACTORS AFFECTING EATING HABITS AMONG NURSES ...

Participants (n = 282) completed a questionnaire describing a recent change in eating behaviour (becoming a vegetarian, cutting out a food group, eating fewer calories), their intentions, their attitudes to the food being avoided, a range of motivations and their degree of success. The results showed that the three behaviour change groups differed in terms of their cognitions with those trying to eat fewer calories reporting less success in changing their behaviour.

Understanding successful behaviour change: the role of ...
