Chemistry Concepts: Energy Levels and Orbitals A lot of chemistry is explained by the sharing and trading of electrons between atoms. Understanding how electrons are arranged in an atom is a building block of Chem I. Electrons in an atom are contained in specific energy levels (1, 2, 3, and so on) that are different distances from the nucleus.

Confidence is a key to being successful in all things in life. School and tests especially chemistry tests are no different. When you study, start with the easier material and then work your way up to the more challenging stuff. Do the first couple of practice problems in your textbook's chapter review or on the study guide.

[10 Study Pointers for Chemistry Tests - dummies](#)

Chemists need to write out formulas and equations to solve chemistry problems. In this unit, we begin to name and write compounds and learn how to write out and balance chemical equations. Equations enable us to describe chemistry topics in mathematical terms and predict the outcomes of reactions.
