[Gallup's Jim Clifton on The Coming Jobs War](#)

The problem is that leaders don't know how to create jobs, especially in America. What they should do is recognize that the world is in a war for jobs. It seems that leadership has lost the will to win, especially in America, but this is a competition for our lives. To win, leaders need to compete.

Definitive leadership strategy for fixing the American economy, drawn from Gallup's unmatched global polling and written by the company's chairman. What everyone in the world wants is a good job. “This is one of the most important discoveries Gallup has ever made,” says the company's Chairman, Jim Clifton. In The Coming Jobs War, Clifton makes the bold assertion that job creation and successful entrepreneurship are the world's most pressing issues

right now, outpacing runaway government spending, environmental degradation and even the threat of global terrorism. The book is grounded in findings from Gallup's World Poll, which reveals the implications of the jobs war on everything from economics to foreign policy to nothing less than America's moral authority in the world. And it offers a prescription for attacking the jobs issue head-on. Clifton argues that the solution to creating good jobs must be found in cities, not in the federal government. Promoting entrepreneurship and job creation must be the sole mission and purpose of cities' business leaders, government officials and philanthropists. Clifton says that the next big breakthrough will come from the combination of the forces within big cities, great universities and powerful local leaders. Their combined effect is the most reliable, controllable and predictable solution to America's biggest problem. Strong leadership teams and a natural order are already in place within cities — in governments and local business and philanthropic entities, with caring leaders working on initiatives to fuel local economic growth and to create good jobs. The feat these leaders have to pull off is doubling their entrepreneurial energy by aligning their local forces: local tribal leaders, super mentors and universities. Winning the jobs war will require all hands on deck, and failure is not an option, especially for the United States, which has been the global leader in promoting freedom and entrepreneurship. America's place in the world is at stake, and there are other countries poised to surpass a sputtering U.S. economy that is currently growing at only 2% annually. The biggest threat? China, with a GDP that is increasing at nearly 10% annually — a pace that will make it the world's leading and most influential economy within the next 30 years. While the statistics are dire, Clifton remains optimistic about America's ability to win the jobs war because America has been here before. "The Greatest Generation saved America by beating the Japanese and Germans at [World War II]. The Baby Boomers saved America a second time by beating the same foes, Japan and Germany, in an economic war that determined the leadership of the free world, again," he says. The Coming Jobs War offers a clear, brutally honest look at America's biggest problem and a cogent prescription for solving it.

Gallup chairman and CEO Jim Clifton presents his perspective on current global employment and job creation issues, how these affect society in general, and his recommendations for creating good jobs.

Definitive leadership strategy for fixing the American economy, drawn from Gallup's unmatched global polling and written by the company's chairman. What everyone in the world wants is a good job. The Coming Jobs War offers a clear, brutally honest look at America's biggest problem and a cogent prescription for solving it.

From 2020 Democratic presidential candidate Andrew Yang, a captivating account of how "a skinny Asian kid from upstate" became a successful entrepreneur, only to find a new mission: calling attention to the urgent steps America must take, including Universal Basic Income, to stabilize our economy amid rapid technological change and automation. The shift toward automation is about to create a tsunami of unemployment. Not in the distant future--now. One recent estimate predicts 45 million American workers will lose their jobs within the next twelve years--jobs that won't be replaced. In a future marked by restlessness and chronic unemployment, what will happen to American society? In *The War on Normal People*, Andrew Yang paints a dire portrait of the American economy. Rapidly advancing technologies like artificial intelligence, robotics and automation software are making millions of Americans' livelihoods irrelevant. The consequences of these trends are already being felt across our communities in the form of political unrest, drug use, and other social ills. The future looks dire-but is it unavoidable? In *The War on Normal People*, Yang imagines a different future--one in which having a job is distinct from the capacity to prosper and seek fulfillment. At this vision's core is Universal Basic Income, the concept of providing all citizens with a guaranteed income-and one that is rapidly gaining popularity among forward-thinking politicians and economists. Yang proposes that UBI is an essential step toward a new, more durable kind of economy, one he calls "human capitalism."

Traces lesser-known events in the history of the modern U.S. Capitol building while revealing the significant contributions of Confederacy president Jefferson Davis, Union quartermaster general Montgomery Meigs, and architect Thomas U. Walter.

Chronicles the history of the American Civil War, starting with the Democratic Party's Charleston Convention in 1860, and ending with first battle of the war at Bull Run.

Thirty years ago, the bestselling "letter to the government" *Work in America* published to national acclaim, including front-page coverage in *The New York Times*, *Wall Street Journal*, and *Washington Post*. It sounded an alarm about worker dissatisfaction and the effects on the nation as a whole. Now, based on thirty years of research, this new book sheds light on what has changed - and what hasn't. This groundbreaking work will illuminate the new critical issues - from worker demands to the new ethical rules to the revolution in culture at work.

There's no real homecoming for many of our veterans returning from the wars in Iraq and Afghanistan. They may go through the motions of daily life in their hometowns, but the terrible sights and sounds of war are still fresh in their minds. This empathic, inside look into the lives of our combat veterans reveals the lingering impact that the longest wars in our nation's history continue to have on far too many of our finest young people. Basing her account on numerous interviews with veterans and their families, the author examines the factors that have made these recent conflicts especially trying. A major focus of the book is the extreme duress that is a daily part of a soldier's life in combat zones with no clear frontlines or perimeters. Having to cope with

unrecognizable enemies in the midst of civilian populations and attacks from hidden weapons like improvised explosive devices exacts a heavy toll. Compounding the problem is the all-volunteer nature of our armed forces, which often demands multiple deployments of enlistees. This results in frequent cases of post-traumatic stress disorder and families disrupted by the long absence of one and sometimes both parents. The author also discusses the lack of connectedness between civilian society and military personnel, leading to inadequate healthcare for many veterans. This deficiency has been highlighted by the urgent need to treat traumatic brain injuries in survivors of explosions and the high veteran suicide rate. Bouvard concludes on a positive note by discussing some of the surprising and encouraging ways that the chasm between civilian and military life is being bridged to help reintegrate our returning soldiers. For veterans, their families, and especially for civilians unaware of how much our soldiers have endured, *The Invisible Wounds of War* is important reading.

Book Review

One issue could lead to a disastrous war between the United States and China: Taiwan. A growing number of Taiwanese want independence for their island and regard mainland China as an alien nation. Mainland Chinese consider Taiwan a province that was stolen from China more than a century ago, and their patience about getting it back is wearing thin. Washington officially endorses a "one China" policy but also sells arms to Taiwan and maintains an implicit pledge to defend it from attack. That vague, muddled policy invites miscalculation by Taiwan or China or both. The three parties are on a collision course, and unless something dramatic changes, an armed conflict is virtually inevitable within a decade. Although there is still time to avert a calamity, time is running out. In this book, Carpenter tells the reader what the U.S. must do quickly to avoid being dragged into war.
