Significant changes have taken place in the policy landscape surrounding cannabis legalization, production, and use. During the past 20 years, 25 states and the District of Columbia have legalized cannabis and/or cannabidiol (a component of cannabis) for medical conditions or retail sales at the state level and 4 states have legalized both the medical and recreational use of cannabis. These landmark changes in policy have impacted cannabis use patterns and perceived levels of risk. However, despite this changing landscape, evidence regarding the short- and long-term health effects of cannabis use remains elusive. While a myriad of studies have examined cannabis use in all its various forms, often these research conclusions are not appropriately synthesized, translated for, or communicated to policy makers, health care providers, state health officials, or other stakeholders who have been charged with influencing and enacting policies, procedures, and laws related to cannabis use. Unlike other controlled substances such as alcohol or tobacco, no accepted standards for safe use or appropriate dose are available to help guide individuals as they make choices regarding the issues of if, when, where, and how to use cannabis safely and, in regard to therapeutic uses, effectively. Shifting public sentiment, conflicting and impeded scientific research, and legislative battles have fueled the debate about what, if any, harms or benefits can be attributed to the use of cannabis or its derivatives, and this lack of aggregated knowledge has broad public health implications. The Health Effects of Cannabis and Cannabinoids provides a comprehensive review of scientific evidence related to the health effects and potential therapeutic benefits of cannabis. This report provides a research agendaâ€"outlining gaps in current knowledge and opportunities for providing additional insight into these issuesâ€"that summarizes and prioritizes pressing research needs.

Carefully curated compendium of laws designed to give the reader a deep understanding of the statutes which govern cannabis and hemp in the Golden State. Includes a Table of Contents with detailed section descriptors, the regulations promulgated by CalCannabis Cultivation Licensing, the Bureau of Cannabis Control, and the Manufactured Cannabis Safety Branch, and other agencies, as well as a handy Index for ease of reference.

Should we legalize marijuana? If we legalize, what in particular should be legal? Just possessing marijuana and growing your own? Selling and advertising? If selling becomes legal, who gets to sell? Corporations? Co-ops? The government? What regulations should apply? How high should taxes be? Different forms of legalization could bring very different results. This second edition of Marijuana Legalization: What Everyone Needs to Know® discusses what is happening with marijuana policy, describing both the risks and the benefits of using marijuana, without taking sides in the legalization debate. The book details the potential gains and losses from legalization, explores the "middle ground" options between prohibition and commercialized production, and considers the likely impacts of legal marijuana on occasional users, daily users, patients, parents, and employers - and even on drug traffickers.

## Read Online Dispensary Policies Procedures

Navigate the fast-evolving regulatory framework of marijuana in Illinois with this portable single volume, which includes both the Cannabis Regulation and Tax Act and the Cannabis Control Act, as well as related laws and regulations selected from throughout the Illinois Compiled Statutes Annotated and the Illinois Administrative Code.

Oregon Marijuana Laws and Regulations is the authoritative resource for marijuana medical and retail laws in Oregon. This publication offers users a comprehensive guide to this new and growing area of Oregon law.

Food Safety Lessons for Cannabis-infused Edibles details the world of cannabis-infused edibles and the way its manufacturing is evolving as the industry moves from isolation to regulatory compliance. The cannabis industry has unique challenges as cannabis-infused edibles are not regulated as food, drugs or dietary supplements at the federal level. Despite these current conditions, the industry is aware of the need to examine the safety of these edibles and prepare for a future of federal compliance. The book looks at the cannabis industry through a scientific lens to increase awareness and expertise in food safety within the field of cannabis-infused edibles.

The legalization of marijuana has spread rapidly throughout the United States, from just a handful of states ten years ago to now more than half, as well as the nation ' s capital. In Canada, it is legal to use and distribute nationally. Thousands of cities and towns are following suit. Legalization seems to be a win-win—people who use cannabis for health and recreation are served, business is brisk, and many governments welcome the much-needed boost in tax revenue. But not everyone thinks so. The rapid pace of legalization has spurred debate among citizens, cities, states and the federal government. This collection of essays explains the benefits and concerns, the policies and actions, and the future of this controversial issue.

Compiled by our team of expert editors and staff attorneys at LexisNexis in collaboration with the Illinois Pharmacists Association, this pharmacy law book provides an easy reference when you need to answer a question quickly. You'll find coverage of a range of Illinois pharmacy laws, procedures, forms and addresses you need. PLUS you will enjoy a bonus content of the DEA Pharmacist's Manual. Purchasing this regularly updated publication means you can keep abreast of the latest changes in the law. Students studying for a pharmacy license, pharmacy technicians, and managers purchasing for a chain of pharmacies will find the Illinois Pharmacy Laws and Regulations is the comprehensive resource you reference daily at a price you can afford.

Marijuana Law, Policy, and Authority is a first-of-its-kind law school casebook in a rapidly-emerging and exciting new field. The accessible, comprehensive, and engaging material guides students through the competing approaches to regulating marijuana, the purposes and effects of those approaches, and the legal authorities for choosing among them. The helpful organization intersperses these issues of substantive law, policy, and authority throughout the discussion of users, suppliers, and third parties. Substantive law materials cover either prohibitions or regulations targeting users, suppliers, or third parties. Policy materials cover the goals of marijuana law and policy as well as the research on the impact of different marijuana policies. Authority materials address the different levels of government--federal, state, and local. Notes, questions, and numerous problems in each chapter provide additional thought-provoking material and help to reinforce student learning. Current, news-headlining cases keep the discussion interesting and lively. Key Features: Internationally renowned author Robert Mikos is the premier authority on marijuana law. He draws upon nearly a decade of professional experience teaching, lecturing, consulting, and writing about marijuana law and policy. Three distinct but inter-woven topics are covered: the substantive law governing marijuana; the policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. Students are guided through the multi-faceted legal and policy issues now confronting lawyers, lawmakers, judges, and policy analysts working in this emerging field. Written in a style that is familiar to law students, but also accessible to a much broader audience, including graduate and upper level undergraduate students in courses in policy studies, political science, and criminology. Cutting-edge issues are included that are intellectually engaging for students and professors alike--e.g., how are conflicts between state/ federal law resolved? What are the roles of courts and executive officers in terms of policy? Dives deeply into classic legal issues: contract enforceability and powers of court, Congress, and the state. Notes and Questions following cases offer stimulating fodder for discussion.
