Economic Dispatch Concepts Practices And Issues

The dispatch is integrated with the economic dispatch of conventional generation. The algorithm for the dispatch and coordination of DLC takes into account all operational ... [Show full abstract...]

(PDF) Economic Dispatch in power systems

Given a network of power generators, the economic dispatch problem is concerned with finding how much power each unit should generate for a given demand, while minimizing the total operational costs, which are generally expressed in nonlinear form. By extending the problem over a multi-period time and including the decisions of switching units on or off at a given time period, this gives rise to the unit commitment problem.
