don't designate a process to get to the said outcome. One could create a process to create the desired outcome. Ultimately, a specific vendor will need to create an internal process to create the drawing's resultant objective. Each fabrication process will be unique at some level.

~~Dan's 1st Law of Drawings — SolidSmack~~  
Engineering Drawing: First angle projection and Third Angle Projection. Engineering Drawing is the language of Engineers. Having a good communication skill is one important qualities for a successful career. If you want yourself to be a Successful Engineer sound knowledge in Engineering Drawing is a Must.

~~Engineering Drawing: First angle projection and Third ...~~

An Engineering Drawing (ED) is the language of engineers. It is used to fully and clearly define requirements for engineered items. It is a graphical language more than drawing pictures, where it communicates ideas and information from one mind to another. Geometrical Drawing is the foundation of all engineering drawings.

~~Engineering Drawing Text Book pdf by ND Bhatt — Latest ...~~

Engineering drawings, being one of the many forms of technical communication, have to fulfill some accepted standards. There are

various national, multinational and international standards, but the current trend in most countries is to adhere (adopt) the ISO standards. Thus for the purpose of this course, we will adhere to the ISO standards.

## ~~BASIC ENGINEERING DRAWING~~ — ~~WikiEducator~~

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia

## ~~Engineering drawing~~ — ~~Wikipedia~~

The first drawing is the front view (drawn looking straight at the front of the L-shape), the second is a drawing of the L-shape seen from the side (known as side view) and last of all a drawing from above known as a plan view. The red lines are faint guidelines and they are drawn to help keep each view in line, level and the same size.
