About Faust in Copenhagen. A physicist himself, Gino Segr\u00e8 writes about what scientists do?and why they do it?with intimacy, clarity, and passion. In Faust in Copenhagen, he evokes the fleeting, magical moment when physics?and the world?was about to lose its innocence forever. Known by physicists as the miracle year, 1932 saw the discovery of the neutron and antimatter, as well as the first artificially induced nuclear transmutations.
