Financial instruments under IFRS - PwC

This is a great guide to IFRS and IAS, which I highly recommend to anyone in controlling or reporting functions at a financial institution. Pooja has poured through these very lengthy and dry financial instruments standards and presented a very comprehensible summary of major accounting topics, including netting, classification, consolidation, derecognition, hedging effectiveness, and disclosures.

of financial assets, financial liabilities, and some contracts to buy or sell non-financial items. Financial instruments are initially recognised when an entity becomes a party to the contractual provisions of the instrument, and are classified into various categories depending upon the type of instrument, which then determines the subsequent measurement of the instrument (typically amortised cost or fair value).

Financial Instruments: Recognition and Measurement - IAS 39

IFRS 9 specifies how an entity should classify and measure financial assets, financial liabilities, and some contracts to buy or sell non-financial items. IFRS 9 requires an entity to recognise a financial asset or a financial liability in its statement of financial position when it becomes party to the contractual provisions of the instrument.

IFRS 9 Financial Instruments

IFRS 9 generally is effective for years beginning on or after January 1, 2018, with earlier adoption permitted. However, in late 2016 the IASB agreed to provide entities whose predominate activities are insurance related the option of delaying implementation until 2021.

Initial measurement of financial instruments Under IFRS 9 all financial instruments are initially measured at fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs. This requirement is consistent with IAS 39. Financial assets: subsequent measurement Financial asset classification and measurement is an area where many changes have been introduced by IFRS 9.

IFRS 9: Financial Instruments - high level summary

A financial instrument will be a financial liability, as opposed to being an equity instrument, where it contains an obligation to repay. Financial liabilities are then classified and accounted for as either fair value through profit or loss (FVTPL) or at amortised cost. Financial liabilities at amortised cost
