Parrino, Kidwell & Bates, Fundamentals of Corporate Finance2nd Edition is a balanced approach to the main theme of value creation balanced by risk management. The goal of this text is to provide both intuitive and calculation based- to master content.

Corporate Finance, by Ross, Westerfield, and Jaffe is a popular textbook that emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. Brad Jordan, known for his successful work on the RWJ Fundamentals and Essentials books, contributed to this edition. His influence will be seen particularly in the writing style with smoother coverage of topics, and the increased quality in the problem material.

Corporate Finance, 3e offers a dynamic, modern and practical approach that illustrates how financial management really works. It features up-to-date content including a focus on ethics in finance, following the Australian Royal Commission into Misconduct in the Banking, Superannuation and Financial Services Industry. This resource is distinguished by the cash-flow 'arc' of the narrative, which gives a practical learning path, and the use of real options - a practical analysis tool that is used in corporate finance. Students are provided with an engaging and contemporary learning path, giving them realistic preparation for a career in finance. The strong five-part framework of the book is supported by integrated online elements and easy-to-read chapter narratives. Premium online teaching and learning tools are available on the MindTap platform. Learn more about the online tools cengage.com.au/mindtap

Provides students with an inexpensive note-taking system that contains a reduced copy of every slide in the PowerPoint presentation.

Fundamentals of Corporate Finance was designed and developed for a first course in business or corporate finance, for both finance majors and non-majors alike. The text is nearly self-contained in terms of background or prerequisites, assuming some familiarity with basic algebra and accounting concepts, while still reviewing important accounting principles very early on. The organization of this text has been developed to give instructors the flexibility they need. The best-selling text has three basic themes that are the central focus of the book: 1) An emphasis on intuition: the authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics. 2) A unified valuation approach: net present value (NPV) is treated as the basic concept underlying corporate finance. 3) A managerial focus: the authors emphasize the role of the financial manager as a decision maker, and they stress the need for managerial input and judgment.
