The main idea behind the Giving Voice to Values (GVV) approach to values-driven leadership development is the observation that a focus on building awareness—on teaching employees to recognize and analyze ethical issues in a particular situation—is insufficient.

## Giving Voice to Values in Leadership | Babson College

Babson College researcher Mary C. Gentile lucidly outlines and discusses the fundamentals of the "Giving Voice to Values" (GVV) curriculum she launched at the Aspen Institute in conjunction with Yale University. This ethics-based course of study is now part of more than 140 college-level business education programs worldwide.

One of the best books I have read on the subject is Giving Voice to Values by Mary C. Gentile, a Babson College educator and consultant who draws on her business experiences to challenge the conventional notion of business ethics at companies and as taught in business schools. I highly recommend the book to business leaders, those who want to lead any organization in an ethical manner, and ...

## ~~Giving Voice to Values – Ethics Sage~~

“ Giving Voice to Values ” (GVV) is a business curriculum launched by Aspen Institute and Yale School of Management, now based and supported at Babson College. “ Giving Voice to Values ” is a pioneering approach to values-driven leadership that has been featured in BizEd, Financial Times, Harvard Business Review, McKinsey Quarterly, Stanford Social Innovation Review and other publications and piloted in over 385 business schools and organizations globally.

How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite? Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at

## Read Free Giving Voice To Values Babson College Capsltd

companies and business schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises, and scripts for handling a wide range of ethical dilemmas, Gentile empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. *Giving Voice to Values* is an engaging, innovative, and useful guide that is essential reading for anyone in business.

Despite four decades of good faith effort to teach ethics in business schools, you'll still find today headlines about egregious excess and scandal. It becomes reasonable to ask why these efforts have not been working. Business faculty in ethics courses spend a lot of time teaching theories of ethical reasoning and analyzing those big, thorny dilemmas—triggering what one professor called “ethics fatigue.” But what if faculty stopped focusing on ethical analysis and focused on a new curriculum—one that builds a conversation across the core curriculum (not only in ethics courses) and also provides the teaching aids for a new way of thinking about ethics education?

This is where Giving Voice to Values (GVV) comes in—the GVV curriculum asks the question: “ What if I were going to act on my values? What would I say and do? How could I be most effective? ” This book will help faculty across the business curriculum with examples, strategies, and assistance in applying the GVV approach. In addition to an introductory chapter, which explains the rationale and strategy behind GVV, there are twelve individual chapters by faculty from the major business functional areas and from faculty representing different geographic regions. The book is a useful guide for faculty from any business discipline on HOW to use the GVV approach in his or her teaching.

In 2001, as a young university graduate, Dennis Gentilin became a member of a FX trading desk at one of Australia ’ s largest banks, the National Australia Bank. In the years that followed the desk became involved in a trading scandal that resulted in the resignation of the chairman and CEO, the upheaval of the board of directors, significant financial loss, and incalculable reputational damage. It was in this environment that the true meaning of business ethics was revealed to Gentilin. In this ground breaking book, Gentilin draws on both his personal experience and the emerging literature in the various disciplines of psychology to provide a very unique insight into the origins of ethical failures. The intellectual depth Gentilin provides coupled with his real life reflections make this book a must read for senior leaders, regulators, consultants, students and practitioners. Amongst other things, the book highlights the shortcomings associated with the traditional approaches used to

explain and address ethical failures and illustrates how easily we can all, individuals and organisations alike, be complicit to unethical conduct. More importantly, it provides lessons and guidance to all leaders who aspire to build institutions that are more resilient to ethical failure.

Differences that Work captures the critical themes & ongoing debates on the topic of workplace diversity--radical differences, women, AIDS, aging, family, disabilities--producing a clear-eyed approach to complex dilemmas. Thirteen articles & three case studies from the Harvard Business Review confront today's issues, documenting 20 years of organizations' & managers' changing experience of difference. This collection features such eminent practitioners & thinkers on diversity as R. Roosevelt Thomas, Jr., Felice Schwartz, Edward W. Jones, Jr., & Charles & Fran Sussner Rodgers.

Make Every Business Day Your Masterpiece Every Leader Is an Artist makes the compelling case that many of the attributes that make a person a great leader are actually those that make someone a superior artist: intention, focus, authenticity, skill, and imagination. Providing the tools and techniques for developing these qualities, O ' Malley and Baker offer vignettes that draw parallels between the personal qualities of famous artists and effective leadership. Dr. Michael O ' Malley is an adjunct professor at Columbia Business School and CEO of Promontory Financial Risk Management. He previously served as Executive Editor for Business,

Economics, and Law at Yale University Press. Dr. William F. Baker directs the Bernard I. Schwartz center for Media Education, and Public Policy at Fordham University. He has won seven Emmys for his work in broadcasting.

Values-driven organizations are the most successful organizations on the planet. This book explains that understanding employees ' needs—what people value—is the key to creating a high performing organization. When you support employees in satisfying their needs, they respond with high levels of engagement and willingly commit their energies to the organization, bringing passion and creativity to their work. This new edition of *The Values-Driven Organization* provides an updated set of tools to assess corporate culture, new case studies on cultural transformation and additional materials on sustainability, measuring cultural health at work and the specific needs of the millennial generation. *The Values-Driven Organization* is essential reading for students, researchers and practitioners of organizational change, leadership, HRM and business ethics.

Most people would agree that thoughtful behavior and common decency are in short supply, or simply forgotten in hurried lives of emails, cellphones, and multi-tasking. In *Choosing Civility*, P. M. Forni identifies the twenty-five rules that are most essential in connecting effectively and happily with others. In clear, witty, and, well...civilized language, Forni covers topics that include: \* Think Twice Before Asking Favors \* Give Constructive Criticism \* Refrain from Idle Complaints \* Respect

Others' Opinions \* Don't Shift Responsibility and Blame \* Care for Your Guests \*  
Accept and Give Praise Finally, Forni provides examples of how to put each rule into practice and so make life-and the lives of others-more enjoyable, companionable, and rewarding. Choosing Civility is a simple, practical, perfectly measured, and quietly magical handbook on the lost art of civility and compassion. “ Insightful meditation on how changing the way we think can improve our daily lives. ... A deft exploration that urges us to think before speaking. ” —Kirkus, Starred Review

R.A Fernando draws upon his experiences at the United Nations Global Compact, his studies at the University of Cambridge Institute for Sustainability Leadership, and his time working at multinational corporations as he explores how to overcome the world ' s toughest challenges. He outlines why global warming, the depletion of natural resources, and pollution should be everyone ' s concern—and how these things will devastate entire nations. That is, unless we do something to stop it. Tackling the problems will require business leaders to include sustainability as part of their long-term plans, he argues. Sweeping corporate changes must be made to ensure the Earth ' s preservation. In this carefully researched book packed with valuable statistics, current figures, historical data, and scary projections, he explores seven imperatives for sustainable businesses and how businesses can improve returns on capital by investing in sustainability-led differentiation and innovation. Embedding sustainability into corporate strategy could be just what businesses need to do, to boost operations while galvanizing peers and competitors to do what ' s right. Learn

how companies, employees, and shareholders can win by working for Strategic Corporate Sustainability.

In years past, the keywords for leaders were confidence, single-minded purpose, and strategic planning. But today 's vastly complex, globalized, and fast-evolving world requires a different kind of leadership. This game-changing book details a new approach—entrepreneurial leadership—developed at Babson College, the number-one school for entrepreneurship in the world. Entrepreneurial leadership is inspired by, but is separate from, entrepreneurship. It can be applied in any organizational situation, not just start-ups. Based on two years of extensive research, it embraces three principles that add up to a fundamentally new worldview of business and a new logic of decision making. First, rapid change and increasing uncertainty require leaders to be “cognitively ambidextrous,” able to shift between traditional “prediction logic” (choosing actions based on analysis) and “creation logic” (taking action despite considerable unknowns). Guiding this different way of thinking and acting is a new view of business, where simultaneous creation of social, environmental, and economic value is the order of the day. Finally, entrepreneurial leaders leverage their understanding of themselves and their social context to guide effective action. Each chapter offers concrete examples of how educators across all disciplines are integrating these ideas into their courses—and even their entire curricula. The New Entrepreneurial Leader lays out a comprehensive new paradigm for reinventing management education in order to mold leaders who will shape social and economic

opportunity.

When business, government, and other professions fail to meet their responsibilities, it is most often not from an inadequacy of tools, techniques, and theory but from an absence of vision and a failure of leadership that saps all sense of individual or organizational purpose and responsibility. To address this concern, management education must be more than the transfer of skills. It should be a moral endeavor, a passing-on from one generation to the next of a kind of wisdom about responsible moral commitment in complex contexts. Faculty at professional schools have an opportunity and a responsibility to help students connect their capacity for high achievement to a sense of purpose and a set of principles. This book is an explanation of how one business school is trying to place leadership, ethics, and corporate responsibility at the center of its mission. It is a call to rebalance the educational trilogy of values, knowledge, and skills. *Can Ethics Be Taught?* traces the evolution, strategy, and implementation of the pathbreaking Leadership, Ethics, and Corporate Responsibility program at the Harvard Business School. It describes in detail the origins of the initiative for this program, the sophisticated research that went into the approach, timing, and appropriate interventions for working with students and faculty, as well as the design of the program strategy itself. The accomplishments of this program have been substantial; and the lessons drawn from the experience of the Harvard Business School can prove instructive to other professional schools-in such fields as management, public administration, and law-and
