Green urbanism has been applied to cities but not in Asia. Seven characteristics of green urbanism are outlined and then applied to Singapore. The Renewable City is not yet a concept for Singapore. The Carbon Neutral City is being developed for an island Palau Ubin and by some firms but not to significant sectors or parts of urban Singapore.

Urbanism is the study of how inhabitants of urban areas, such as towns and cities, interact with the built environment. It is a direct component of disciplines such as urban planning, which is the profession focusing on the physical design and management of urban structures and urban sociology which is the academic field the study of urban life and culture.

Urbanism - Wikipedia

The 15 guiding Principles of Green Urbanism
3.1 Principle 1: climate and context
3.2 Principle 2: renewable energy for zero CO₂ emissions
3.3 Principle 3: zero-waste city
3.4 Principle 4: water
3.5 Principle 5: landscape, gardens and urban biodiversity
3.6 Principle 6: sustainable transport and good public space: compact and poly-centric cities
3.7 Principle 7: local and sustainable materials with less embodied energy
3.8 Principle 8: density and retrofitting of existing districts
3.9 ...
