Over millions of years the Earth's surface shifts and changes. For example, rocks...

~~What can we learn from fossils?~~—BBC Bitesize

How Do Fossils Show Change? Most organisms live, die, and decompose. They leave no traces of having lived. Under certain conditions, an organism's remains or tracks may be preserved as a fossil. Fossils give clues about how an organism looked and where it lived. They are often used by scientists as evidence of change.

~~Canon Pale Curriculum Unit: 3 Evolution Lesson Plan 40~~

Palaeontologists can date the rocks containing fossils so that these fossils can be placed accurately on a timeline to show how a species can change or develop over millions of years. The timeline...
