International trade law includes the appropriate rules and customs for handling trade between countries. However, it is also used in legal writings as trade between private sectors, which is not right. This branch of law is now an independent field of study as most governments have become part of the world trade, as members of the World Trade Organization. Since the transaction between private sectors of different countries is an important part of the WTO activities, this latter branch of law is

This book presents a comprehensive and systematic study of the principal aspects of the modern law of international commercial transactions. Based on diverse sources, including legislative texts, case law, international conventions, and a variety of soft-law instruments, it highlights key topics such as the international sale of goods, international transport, marine insurance, international finance and payments, electronic commerce, international commercial arbitration, standard trade terms, and international harmonization of trade laws. In focusing on the private law aspects of international trade, the book closely analyzes the relevant statutes, case law and the European Union (EU) and international uniform law instruments like the Rome I Regulation, the UN Convention on the Contracts for the International Sale of Goods (CISG), UNCITRAL Model Laws, non-legislative instruments including restatements such as the UNIDROIT Principles on International Commercial Contracts, and rules of business practices codified by the ICC such as the Arbitration Rules, UCP 600 and different versions of the INCOTERMS. The book clearly explains the key concepts and nuances of the subject, offering incisive and vivid analyses of the major issues and developments. It also traces the evolution of the law of international trade and explores the connection between the *lex mercatoria* and the modern law. Comprehensively examining the issue of international harmonization of trade laws from a variety of perspectives, it provides a detailed account of the work of major players in the field, including UNCITRAL, UNIDROIT, ICC, and the Hague Conference on Private International Law (HCCH). Adopting the comparative law method, this book offers a critical analysis of the laws of two key jurisdictions—India and England—in the context of export trade. In order to stimulate discussion on law reform, it explains the similarities and differences not only between laws of the two countries, but also between the laws of India and England on the one hand, and the uniform law instruments on the other. Given its breadth of coverage, this book is a valuable reference resource not only for students in the fields of law, international trade, and commercial law, but also for researchers, practitioners and policymakers.
