Extensively revised and updated to reflect current events and trends, this new edition continues to engage students in reflection about religious diversity. Primary Source Readings in World Religions provides your students with the opportunity to read foundational texts from the major world religions. Through understanding other religions we can create an atmosphere of genuine respect and honest discussion. In doing this we can respond to the invitation Pope Benedict XVI extended to all of us when he said, "I encourage all religious groups in America to persevere in their collaboration and thus enrich public life with the spiritual values that motivate your action in the world" (from Benedict XVI; Meeting with Representatives of Other Religions.) In Primary Source Readings in World Religions you will find portions of the foundational texts and teachings of a wide variety of world religions, including Islam, Shinto, Confucianism, Sikhism, Judaism, Hinduism, Taoism, Christianity, and Buddhism.>

This unique anthology, now with contributing editor C. Wayne Mayhall, includes spiritual autobiographies of both men and women from a variety of religious traditions within a multicultural context. It presents religion as a "lived experience" and helps students think empathetically about religious experiences in a wide variety of cultural and religious settings.

Offering a fresh assessment of the presence and function of paraenesis within Valentinianism, this book places Valentinian moral exhortation within the context of early Christian moral discourse. Like other early Christians, Valentinians were not only interested in

ethics, but used moral exhortation to discursively shape social identity. Building on the increasing recognition of ethical and communal concerns reflected in the Nag Hammadi sources, this book advances the discussion by elucidating the social rhetoric within, especially, the "Gospel of Truth" and the "Interpretation of Knowledge." The social function of paraenesis is to persuade an audience through social representation. The authors of these texts discursively position their readers, and themselves, within engaging moments of narrativity. It is hoped that this study will encourage greater integration of research between those working on the Nag Hammadi material and those studying early Christian paraenetic discourse.

"Experiencing the World's Religions" is a leading seller because it successfully addresses what a person should know about religions, and why. Michael Molloy provides an exceptionally clear and compelling account of the teaching of the world's religions. The text covers all the essential material and goes beyond traditional approaches to personally connect students with the vitality of the great religions.

Drawing on the knowledge and experience of interfaith leaders from the world's many faiths, this practical guide will help you effectively engage people of other faith traditions to increase understanding and acceptance in your community and beyond.
