**Example Lifecycle.** The Faces Controller servlet serves as the link between the user and the JSF application. It operates within the confines of a well defined JSF Lifecycle which dictates the entire flow of events between user requests. For example, upon an initial Web request to access a JSF application,

# Online Library Javasever Faces Introduction By

Example  
The Faces controller servlet handles the request by first preparing the JSF context, which is a Java object that holds all application data.
