James O. Pennock has compiled 45 years of personal experience into this how-to guide. Focusing on the position of "lead in charge," this book is an indispensable resource for anyone, new or seasoned veteran, whose job it is to lead the piping engineering and design of a project. The "lead" person is responsible for the successful execution of all piping engineering and design for a project, technical and non-technical aspects alike. The author defines the roles and responsibilities a lead will face and the differences found in various project types. Incorporates four decades of personal experience in a How-To guide Focuses on the position of "lead in charge" Includes coverage of topics often ignored in other books yet essential for success: management, administrative, and control responsibilities

DK is the world's leading illustrated reference publisher, producing beautifully designed books for adults and children in over 120 countries.

Provides information on responsive solutions to Web site design, covering such topics as wireframes, text, breakpoints, screenshots, browsers, and design manuals.

This book is a comprehensive primer to both traditional and emerging E-Commerce technologies. Students with no prior technical knowledge will be able to grasp complex topics such as networking, Internet security, Web languages and other important subjects in a way that illustrates their use through case studies and practice by completing Web projects.

For every American fighter pilot involved in the Vietnam War, the ultimate goal was to 'kill a MiG'. In eight years of conflict 43 Vietnamese Peoples Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews, and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War, in April 1965, as well as scoring the last in January 1973. This volume charts the successes of the navy fighter crews as they encountered 'MiGs, Missiles and AAA' over the jungles of North Vietnam.

A coverage of the Transputer Development System (TDS), an integrated programming environment which facilitates the programming of transputer networks in OCCAM. The book explains transputer architecture and the OCCAM programming model and incorporates a TDS user guide and reference manual.
