Play 50 of your favorite pop tunes on your alto sax! This collection features arrangements written in accessible keys and ranges with lyrics and chord symbols. Songs include: All My Loving * Blowin' in the Wind * Clocks * Don't Stop Believin' * Every Breath You Take * Fireflies * Hey, Soul Sister * In My Life * Love Story * My Girl * Nights in White Satin * Sweet Caroline * Unchained Melody * Viva La Vida * What a Wonderful World * You've Got a Friend * and more.

This book is a comprehensive guide to new DFT methods that will show the readers how to design a testable and quality product, drive down test cost, improve product quality and yield, and speed up time-to-market and time-to-volume. Most up-to-date coverage of design for testability. Coverage of industry practices commonly found in commercial DFT tools but not discussed in other books. Numerous, practical examples in each chapter illustrating basic VLSI test principles and DFT architectures.

"Kids on Bikes is a collaborative storytelling roleplaying game about small towns and big adventures! Jump right into the action quick and create your own band of rag-tag mystery solvers today!"--Publisher's website.

Owen Bishop introduces, through hands-on project work, the mechanics, electronics and programming involved in practical robot design-and-build. The use of the PIC microcontroller throughout provides a painless introduction to programming whilst harnessing the power of a highly popular microcontroller used by students and design engineers worldwide. This is a book for first-time robot builders, advanced builders wanting to know more about programming robots and students in Further and Higher Education tackling microcontroller-based practical work. They will all find this book a unique and exciting source of projects, ideas and techniques, to be combined into a wide range of fascinating robots. · Full step-by-step instructions for 5 complete self-build robots · Introduces key techniques in electronics, programming and construction · for robust robots that work first time · Illustrations, close-up photographs and a lively, readable text make this a fun and informative guide for novice and experienced robot builders

~~Instrumental Folio~~

Once again, in this follow-up to Domain, Steve Alten has ingeniously woven the mysteries of the past into a gripping and unforgettable vision of the future. Mayan legend tells of the Hero Twins, destined to confront the Lords of the Underworld and rescue their long-lost father from the realm of darkness. Merely a two-thousand-year-old myth--or a prophecy of an apocalyptic battle for the soul of mankind? On December 21, 2012, a date long foretold by the Mayan calendar, Michael Gabriel disappeared from the face of the Earth, after saving the entire planet from thermonuclear destruction. Less than a year later, his bereaved wife gave birth to twin sons, both possessed of extraordinary mental and physical gifts. Are these at last the Hero Twins? And yet, as crucial as the twins are, they are not unique. A third child was born on the same fateful day, blessed--or cursed--with the same superhuman talent and potential. Exposed to the uglier side of existence, Lilith will travel down a darker path that leads to eon-distant Xibalba--the Mayan version of hell. An epic battle of good versus evil will begin . . . and the final fate of the human race will be revealed. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Provides an introduction to electronically produced grooves, loops, and sounds on the acoustic drumset and includes exercises, transcriptions, and sound applications to achieve the jungle style.

This thirteen-volume series, which first appeared between 1914 and 1965, is an extensive collection of the pre-thirteenth-century charters and related records of Yorkshire, which had previously remained largely unpublished. The first three volumes were edited by William Farrer (1861–1924), after whose death Charles Travis Clay (1885–1978) took up the task. The series was well respected for the quality of Farrer's editing, which was surpassed only by that of Clay in the later volumes. Volume 6 (1939) is devoted to the Paynel fee, drawn from English and Norman sources. The first chapter focuses on the Paynel family, and the Latin charters presented here are predominantly concerned with lands held by Ralph Paynel and his immediate descendants. The volume also contains facsimile plates of select documents as well as detailed indexes.
