Drawing on in-depth research into almost 500 organisations, this revised and updated text offers evidence of the evolution from traditional group-based equal opportunity policies towards inclusive strategies focusing on the individual's own contribution. It then puts forward a detailed model of diversity based on flexibility, an empowering culture, universal benefits and business-related training defined by individual rather than group needs.

Engaging and provocative writing, as well as a knack for revealing the 'invisible hand' of economics at work has made Tyler Cowen and Alex Tabarrok's text a singularly distinctive and effective text for principles modules. Modern Principles of Economics places an emphasis throughout on the power of incentives which underscores how economics helps us understand why we do what we do (in other words, the decisions we make in the face of incentives in the real world). The new edition retains its progressive approach to economic modelling and applications which allows for a more realistic interpretation of today's world events. Mirroring the authors' successful blog, the text eschews boxed features to focus on the writing behind compelling examples, key concepts, and applications.
