Leo Liberti - LIX - Homepage

Optimization is the most important sub area of the discipline Operations Research. Optimization problems arise in all walks of human activity- particularly in engineering, business, finance and economics. The simplest optimization problems are linear in nature which may be subject to a set of linear constraints.

Operations Research - Course

Optimal solutions are feasible solutions that achieve objective function value (s) as good as those of any other feasible solutions. For example, $q = 200$, $r = 90$ is feasible in constant-rate demand model (1.1) because both constraints are

Optimization in Operations Research | Ronald L. Rardin

...

Operations research (British English: operational research) (OR) is a discipline that deals with the application of advanced analytical methods to help make better decisions. Further, the term operational analysis is used in the British (and some British Commonwealth) military as an intrinsic part of capability development, management and assurance. In particular, operational analysis forms ...
