move up, with well-paying working-class jobs providing a gateway to an ever-growing middle class. Today, however, we have increasing inequality, not economic convergence. Technological advances are putting quality jobs out of reach for workers who lack the proper skills and training. In *Workforce Education*, William Bonvillian and Sanjay Sarma offer a roadmap for rebuilding America's working class. They argue that we need to train more workers more quickly, and they describe innovative methods of workforce education that are being developed across the country.

Dennis B. Klein explores the Jewish consciousness of Freud and his followers and the impact of their Jewish self-conceptions on the early psychoanalytic movement. Using little-known sources such as the diaries and papers of Freud's protégé Otto Rank and records of the Vienna B'nai B'rith that document Freud's active participation in that Jewish fraternal society, Klein argues that the feeling of Jewish ethical responsibility, aimed at renewing ties with Germans and with all humanity, stimulated the work of Freud, Rank, and other analysts and constituted the driving force of the psychoanalytic movement.
