Positive Psychology In A Nutshell: The Science Of ...

Positive psychology changed all of that. Suddenly, there was space at the table for a focus on the positive in life, for " what thoughts, actions, and behaviors make us more productive at work, happier in our relationships, and more fulfilled at the end of the day " (Happify Daily, n.d.).

The Science of Happiness in Positive Psychology 101

In positive psychology, gratitude is the human way of acknowledging the good things of life. Psychologists have defined gratitude as a positive emotional response that we perceive on giving or receiving a benefit from someone (Emmons & McCullough, 2004). A similar explanation was put forth by Emmons and McCullough who said that:

The Neuroscience of Gratitude and How It Affects Anxiety ...

Positive psychology, the science of happiness and well-being, advocates approaching change not from the perspective of difficulty, but rather from the perspective of capitalising on what we have, using our strengths and activating positive experiences. In that it uses well-researched interventions associated with flourishing and well-being.

Positive Psychology and Behaviour Change: 5 Ways to Change ...

One of the key psychological theories behind positive affirmations is self-affirmation theory (Steele, 1988). So, yes, there are empirical studies based on the idea that we can maintain our sense of self-integrity by telling ourselves (or affirming) what we believe in positive ways.

First, positive thinking is about looking at things from a positive point of view. Positive psychology certainly tends to focus on optimism, but it also notes that while there are many benefits to thinking positively, there are actually times when more realistic thinking is more advantageous.

Understanding the Psychology of Positive Thinking

In positive psychology, it has expanded to explain the process of goal attainment better. The theory includes both pathways to goal attainment and agency. Hopeful thought reflects the belief that one can find pathways to desired goals and become motivated to use those pathways (Snyder, C.R. et al., 1991).
