This is a solid foundational undergraduate text written from a fresh and innovative perspective. The text is divided into ten sections covering various key theoretical areas in psychology. There are 41 chapters written by contributors representing universities across South Africa and in the United States and UK. A golden thread narrative is written by psychologist, Kerry Gibson, at the beginning of each chapter, linking the concepts explained to the southern African scenario.

Hospital and Healthcare Security, Fifth Edition, examines the issues inherent to healthcare and hospital security, including licensing, regulatory requirements, litigation, and accreditation standards. Building on the solid foundation laid down in the first four editions, the book looks at the changes that have occurred in healthcare security since the last edition was published in 2001. It consists of 25 chapters and presents examples from Canada, the UK, and the United States. It first provides an overview of the healthcare environment, including categories of healthcare, types of hospitals, the nonhospital side of healthcare, and the different stakeholders. It then describes basic healthcare security risks/vulnerabilities and offers tips on security management planning. The book also discusses security department organization and staffing, management and supervision of the security force, training of security personnel, security force deployment and patrol activities, employee involvement and awareness of security issues, implementation of physical security safeguards, parking control and security, and emergency preparedness. Healthcare security practitioners and hospital administrators will find this book invaluable. FEATURES AND BENEFITS: * Practical support for healthcare security professionals, including operationally proven policies, and procedures * Specific assistance in preparing plans and materials tailored to healthcare security programs * Summary tables and sample forms bring together key data, facilitating ROI discussions with administrators and other departments * General principles clearly laid out so readers can apply the industry standards most appropriate to their own environment NEW TO THIS EDITION: * Quick-start section for hospital administrators who need an overview of security issues and best practices

The main literary dispute of the Renaissance pitted those Neo-Latin writers favoring Cicero alone as the apotheosis of Latin prose against those following an eclectic array of literary models. This Ciceronian controversy pervades the texts and letters collected for the first time in this volume.

The Lovers collects Head's short fiction of the 1960s and 70s, written mainly in Serowe, Botswana, and depicting the lives and loves of African village people pre- and post-independence. An earlier selection called Tales of Tenderness and Power was published in the Heinemann African Writers Series in 1990, but this expanded and updated volume adds many previously unavailable stories collected here for the first time. Anthology favourites like her breakthrough 'The Woman from America' and 'The Prisoner who Wore Glasses' are included, leading up to the first complete text of her much translated title story. Stephen Gray is a noted South African scholar and novelist.

"This study considers the way in which a poetic convention, the beloved to whom Renaissance amatory poetry was addressed, becomes influential political rhetoric, an instrument that both men and women used to shape and justify their claims to power. The author argues that Petrarchan poetic conventions were part of a social discourse that signaled anxiety concerning the rising place of women as intellectual interlocators, public figures, and patrons of the arts."--

By bringing together influential critics of neo-Aristotelian virtue ethics and some of the strongest defenders of an Aristotelian approach, this collection provides a fresh assessment of the strengths and weaknesses of Aristotelian virtue ethics and its contemporary interpretations. Contributors critically discuss and re-assess the neo-Aristotelian paradigm which has been predominant in the philosophical discourse on virtue for the past 30 years.
