 While the script of Pyretown does acknowledge that one of the play's two characters lives around burned-out buildings, and audiences could infer that both characters have burned out their lives, the title remains fairly cryptic during the performance. However, the play that unfolds quickly becomes a vivid engagement between two troubled yet vivacious characters that may be meant for one ...

 After that, he wrote Pyretown, which criticises America's managed care health system through a romance between a divorced mother and a young, wheelchair-using man. Belluso joined the crew of the HBO western drama Deadwood as a writer for the first season in 2004, writing "The Trial of Jack McCall".

John Belluso - Wikipedia
 John Belluso's Pyretown has few subtleties. An emotional blast on the red tape, unfairness, and inadequacies of the managed health care system in the United States, the two-act play begins as a burgeoning love story. Louise is a frazzled mother with single-parent responsibilities who is battling to adequately care for her children.

 This article explores the significance of disability identity at work in John Belluso's 2004 play Pyretown on two primary levels: the level of the play and the level of production. At the level of the play, the dramaturgical use of the lived experience of disability is examined through a postpositivist realist lens.

The fifth edition of The Disability Studies Reader addresses the post-identity theoretical landscape by emphasizing questions of interdependency and independence, the human-animal relationship, and issues around the construction or materiality of gender, the body, and sexuality. Selections explore the underlying biases of medical and scientific experiments and explode the binary of the sound and the diseased mind. The collection addresses physical disabilities, but as always investigates issues around pain, mental disability, and invisible disabilities as well. Featuring a new generation of scholars who are dealing with the most current issues, the fifth edition continues the Reader's tradition of remaining timely, urgent, and critical.

This volume investigates the rise of human rights discourses manifested in the global spectrum of theatre and performance since 1945. Essays address topics such as disability, discrimination indigenous rights, torture, gender violence, genocide and elder abuse.

THE STORY: Inspired by real-life events, HENRY FLAMETHROWA tells the story of sixteen-year-old Henry, a confused and emotionally isolated young man who writes letters to the devil, unbeknownst to his deeply religious father, Peter. Henry's younger

An authoritative survey of different contexts, methodologies, and theories of applied communication The field of Applied Communication Research (ACR) has made substantial progress over the past five decades in studying communication problems, and in making contributions to help solve them. Changes in society, human relationships, climate and the environment, and digital media have presented myriad contexts in which to apply communication theory. The Handbook of Applied Communication Research addresses a wide array of contemporary communication issues, their research implications in various contexts, and the challenges and opportunities for using communication to manage problems. This innovative work brings together the diverse perspectives of a team of notable international scholars from across disciplines. The Handbook of Applied Communication Research includes discussion and analysis spread across two comprehensive volumes. Volume one introduces ACR, explores what is possible in the field, and examines theoretical perspectives, organizational communication, risk and crisis communication, and media, data, design, and technology. The second volume focuses on real-world communication topics such as health and education communication, legal, ethical, and policy issues, and volunteerism, social justice, and communication activism. Each chapter addresses a specific issue or concern, and discusses the choices faced by participants in the communication process. This important contribution to communication research: Explores how various communication contexts are best approached Addresses balancing scientific findings with social and cultural issues Discusses how and to what extent media can mitigate the effects of adverse events Features original findings from ongoing research programs and original communication models and frameworks Presents the best available research and insights on where current research and best practices should move in the future A major addition to the body of knowledge in the field, The Handbook of Applied Communication Research is an invaluable work for advanced undergraduate students, graduate students, and scholars.

Editors Craig Pospisil and Danna Call compiled this new collection of more than fifty monologues selected exclusively from Dramatists Play Service publications from recent seasons. Inside these pages you will find an enormous range of voices and subject matter, characters from their teens to their sixties and authors of widely varied styles, but all immensely talented. These monologues represent some of the best writing in the American theatre today, and we are proud to bring them together in this new volume.

Research has long substantiated the fact that living with a disability creates significant and complex challenges to identity negotiation, the practice of communication, and the development of interpersonal relationships. Furthermore, individuals without disabilities often lack the knowledge and tools to experience self-efficacy in communicating with their differently-abled peers. So how do these challenges translate to the incorporation of disability studies in a classroom context and the need to foster an inclusive environment for differently-abled students? Bringing together a range of perspectives from communication and disability studies scholars, this collection provides a theoretical foundation along with practical solutions for the inclusion of disability studies within the everyday curriculum. It examines a variety of aspects of communication studies including interpersonal, intercultural, health, political and business communication as well as ethics, gender and public speaking, offering case study examples and pedagogical strategies as to the best way to approach the subject of disability in education. It will be of interest to students, researchers and educators in communication and disability studies as well as scholars of sociology and social policy, gender studies, public health and pedagogy. It will also appeal to anyone who has wondered how to bring about a greater degree of inclusion and ethics within the classroom.
