A must-have book for all classic car fans worldwide An indispensable survey for vintage car aficionados as much as curious newcomers Brimming with shiny spoke rims, stunning grilles, and magnificent wooden steering wheels

Originally published in hardcover in 2019 by Doubleday.

The Chevrolet Camaro really needs no introduction to automotive enthusiasts. From its inception (along with the Firebird) in 1967, the Camaro established a reputation that made its name a household word. Insanely popular on the street, successful in all forms of competition, and a perennial best seller, over the past half-century the Camaro has cemented its status as an icon. The Camaro did go on hiatus for an 8-year period, much to the chagrin of Chevrolet, but made a triumphant return in 2010 with the 5th Gen models. Of course the new generation of Camaros is filled with the technology you would expect, including multiple trim versions and a variety of engine packages. And of course, as capable as the new cars are, Camaro enthusiasts always want more. That's where this book comes in. Filling these pages is great step-by-step information on modifying your 5th Gen, including upgrade instruction on brakes, suspension, rear axles, intake and exhaust, cooling, fuel systems, transmissions, LS engine mods, superchargers, turbochargers, ECM tuning, aftermarket EFIs, and more. There is fierce competition on the street for modern muscle supremacy. With Camaro 5th Gen 2010-2015: How to Build and Modify you can keep your Camaro ahead of the competition.

Shift your strategy downstream. Why do your customers buy from you rather than from your competitors? If you think the answer is your superior products, think again. Products are important, of course. For decades, businesses sought competitive advantage almost exclusively in activities related to new product creation. They won by building bigger factories, by finding cheaper raw materials or labor, or by coming up with more efficient ways to move and store inventory—and by inventing exciting new products that competitors could not replicate. But these sources of competitive advantage are being irreversibly leveled by globalization and technology. Today, competitors can rapidly decipher and deploy the recipe for your product's secret sauce and use it against you. “Upstream,” product-related advantages are rapidly eroding. This does not mean that competitive advantage is a thing of the past. Rather, its center has shifted. As marketing professor Niraj Dawar compellingly argues, advantage is now found “downstream,” where companies interact with customers in the marketplace. Tilt will help you grasp the global nature of this downstream shift and its profound implications for your strategy and your organization. With vivid examples from around the world, ranging across industries and sectors, Dawar shows how companies are reorienting their strategies around customer interactions to create and capture unique value. And he demonstrates how, unlike product-related advantage, this value is cumulative, continuously building over time. In an increasingly customer-centered world marketplace, let Tilt serve as your guide to shifting your strategy downstream—and achieving enduring competitive advantage.

James Hetfield, Metallica's front man, opens up his garage for an exclusive tour of the highlights of his incredible collection of restored and customized classic cars. Millions know James Hetfield as the front man of Metallica, but the acclaimed singer-songwriter has enjoyed another lifelong passion: restoring and customizing classic cars into magnificent pieces of automotive art. From cars such as the Skyscraper to the Aquarius and the Black Pearl, James Hetfield's collection of beautifully reimagined classic automobiles is truly stunning. For the first time, Hetfield is opening up his garage and inviting readers to dive under the hood of some of these internationally lauded classics. Featuring dynamic, specially commissioned photography of the cars and insight from Hetfield into their creation, this book is a unique opportunity to learn about the Metallica front man's passion for creating bespoke classic cars. James Hetfield's unique cars will be on display at the Petersen Automotive Museum in Los Angeles starting from February 2020.

Coping with Adversity addresses the question of why some metropolitan-area regional economies are resilient in the face of economic shocks and chronic distress while others are not. It is particularly concerned with what public policies make a difference in whether a region is resilient. The authors employ a wide range of techniques to examine the experience of all metropolitan area economies from 1978–2014. They then look closely at six American metropolitan areas to determine what strategies were employed, which of these contributed to regional economic resilience, and which did not. Charlotte, North Carolina, Seattle, Washington, and Grand Forks, North Dakota, are cases of economic resilience, while Cleveland, Ohio, Hartford, Connecticut, and Detroit, Michigan, are cases of economic nonresilience. The six case studies include hard data on employment, production, and demographics, as well as material on public policies and actions. The authors conclude that there is little that can be done in the short term to counter economic shocks; most regions simply rebound naturally after a relatively short period of time. However, they do find that many regions have successfully emerged from periods of prolonged economic distress and that there are policies that can be applied to help them do so. *Coping with Adversity* will be important reading for all those concerned with local and regional economic development, including public officials, urban planners, and economic developers.

Offers a coherent strategy for ending oil dependence, starting with the United States but applicable worldwide. There are many analyses of the oil problem. This synthesis is the first roadmap of the oil solution, one led by business for profit, not dictated by government for reasons of ideology. This roadmap is independent, peer-reviewed, written for business and military leaders, and co-funded by the Pentagon. It combines innovative technologies and new business models with uncommon public policies: market-oriented without taxes, innovation-driven without mandates, not dependent on major (if any) national legislation, and designed to support, not distort, business logic.

Dynamic Asia has overtaken the European Union as Latin America and the Caribbean's second largest export market, after the United States. However, the region's exports to Asia remain concentrated in few commodities involved a small number of large firms. This book explores the present and future scope for the participation of small and medium-sized enterprises (SMEs) in biregional trade and value chains and the measures that can be taken to make those chains more inclusive and sustainable. It encourages governments in Latin America to improve the business environment in order to encourage multinational firms to invest, upgrade and innovate in the region.
