Teaching Sensation and Perception  
~~Sensation And Perception~~

Sensation and perception are two separate processes that are very closely related. Sensation is input about the physical world obtained by

# Online Library Sensation And Perception

our sensory receptors, and perception is the process by which the brain selects, organizes, and interprets these sensations. In other words, senses are the physiological basis of perception.

The sensation is more physical. It entails the simple awareness of various stimuli. Perception gives meaning to what we sense and can be said it is a mix of sensations with ideas, past experience, and connections with objects or concepts.

# Online Library Sensation And Perception

Sensation does not involve any organization, combination or selection of stimuli.

# Online Library Sensation And Perception

Sensation refers to the process of sensing our environment through touch, taste, sight, sound, and smell. This information is sent to our brains in raw form where perception comes into play. Perception is the way we interpret these sensations and therefore make sense of everything

# Online Library Sensation And Perception

around us. This chapter will describe various theories related to these two concepts and explain the important role they play in the field of psychology.

# Online Library Sensation And Perception

Sensation and perception are elements that balance and complement one another. They work together for us to be able to identify and create meaning from stimuli-related information. Without sensation, perception will not be possible, except for people who

# Online Library Sensation And Perception

believe in extrasensory perception or  
ESP.

~~Sensation and Perception~~  
~~Explorable.com~~

Sensation and perception are two  
similar but distinct processes. When  
we smell a rose, we get a sensation.

# Online Library Sensation And Perception

How we interpret that sensation (i.e. that smells like grandma) is the perception. Sensations bombard our bodies often without our active control; they bring information about our environment to our brain.

~~Sensation vs Perception | Udemy Blog~~

*Page 32/37*

# Online Library Sensation And Perception

Sensation consists of signal collection and transduction. Sensation is the physical process during which sensory systems respond to stimuli and provide data for perception. A sense is any of the systems involved in sensation. During sensation, sense organs engage in stimulus collection.

# Online Library Sensation And Perception

and transduction.

~~Sense—Wikipedia~~

Sensation involves the use of the five senses, which are sight, taste, touch, smell and sound. Perception, on the other hand, refers to the process of organizing and interpreting sensory

# Online Library Sensation And Perception

information in order to understand the environment, as well as the way we respond to it. Sensation is considered to be a part of perception.
