The popular author of Classroom Instruction That Works discusses 10 questions that can help teachers sharpen their craft and do what really works for the particular students in their classroom.

Develop geographic literacy with the only high school geography text co-authored by the National Geographic. Help your students make the connection between geography and history, as well as geography and current events.

The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero,

Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

It's the Grouchy Ladybug's 20th birthday. To celebrate, we are introducing a new, larger format edition with brighter, more colorful pages created from Eric Carle's original artwork using the latest reproduction technology. The Grouchy Ladybug is bigger and brigher, as irascible but irresistible as ever and will surely delight new generations of readers, as well as her devoted fans of all ages. Happy Birthday, Grouchy Ladybug!

Workbook Features: • Ages 9-11, Grades 4-5 • 160 pages, about 8 inches x 10 1 / 2 inches • Reading, writing, math, science, social studies, and more • Includes fun fitness activities • Flash cards, stickers, completion certificate, and answer key included

Hands-On Summer Learning: Summer Bridge Activities Workbook helps fourth—fifth graders keep their skills sharp during the summer months to prevent summer learning loss through fun practice pages and activities, engaging fitness activities, and more. What ' s Included: This book covers all subjects, focusing on reading passages, grammar, multiplying, dividing, social studies, science experiments, fitness activities, and more. Flash cards, reward stickers, and a completion certificate are included. How It Works: Each page is numbered by day so kids and parents can track progress and reach monthly learning goals. Each activity features clear, step-by-step instructions and practice pages to help sharpen students' skills for the school year ahead. Just 15 Minutes A Day: Two months of learning loss occurs during the summer, with the highest losses being in math and spelling. This activity book is designed to prevent summer learning loss in just 15 minutes per day through hands-on activities. Why Summer Bridge: Award-winning Summer Bridge Activities® engage children's creativity and learning potential and keep kids mentally and physically active to prevent summer learning loss and pave the way for a successful new school year ahead.
