User Manual v1.40.2 Overview SDRUno is an advanced Software Defined Radio application platform which is optimized for use with SDRplay range of Radio Spectrum Processing receivers. This means that the specific features of a particular SDRplay RSP receiver model are enabled automatically within SDRUno.

User Manual v1.40 - SDRPlay

Configure Window / RTL-SDR Controller The SDR# configure window can be accessed by clicking on the cog icon at the top of the SDR# window. The settings in this window affect the actual RF performance of the RTL-SDR, and should be set correctly to optimize the signal to noise ratio (SNR).
