Emma's Elf helps girls understand that while strong feelings are perfectly normal, you can't allow let them to control you.

“Handpicked by the Parker estate to be the keeper of the flame for the Spenser franchise, award-winning author Ace Atkins…rises flawlessly to the occasion.”—Kirkus Reviews When fourteen-year-old Mattie Sullivan asks Spenser to look into her mother’s murder, he’s not convinced by her claim that the wrong man was convicted. Mattie is street-smart, wise beyond her years, and now left to care for her younger siblings and an alcoholic grandmother in a dilapidated apartment in South Boston. But her need for closure and her determination to make things right hits Spenser where he lives. As Spenser becomes more involved, he thinks that Mattie may be onto something after all. And he’s going to need the help of his friend Hawk to find peace for Mattie—a job that’s more dangerous than he ever thought.

The noted evangelist provides Bible-based answers to commonly asked questions about the existence and characteristics of heaven, what happens when people die, what they will do in heaven, who will get there, and what difference it makes.

It's never too early to learn about the body! This biology book will educate your little learner on the human body - and not just the physical body parts at that! Don't stop at head, knees, arms and toes. Teach your children about the littlest parts of the body too. Go ahead and secure a copy of this biology book today!

This new graduate level textbook, Cognition and Acquired Language Disorders: An Information Processing Approach, addresses the cognitive aspects of language and communication. It assembles the most recent information on this topic, addressing normal cognitive processing for language in adults, the cognitive impairments underlying language disorders arising from a variety of neurologic conditions, and current assessment and treatment strategies for the management of these disorders. The text is organized using an information processing approach to acquired language disorders, and thus can be set apart from texts that rely upon a more traditional, syndrome-based approach (e.g., stroke, dementia, and traumatic brain injury). This approach facilitates the description and treatment of acquired language disorders across many neurologic groups when particular cognitive deficits are identified. Other useful features of the text include assessment and treatment protocols that are based on current evidence. These protocols provide students and clinicians a ready clinical resource for managing language disorders due to deficits in attention, memory, linguistic operations, and executive functions. Unique process-oriented approach organizes content by cognitive processes instead of by syndromes so you can apply the information and treatment approaches to any one of many neurologic groups with the same cognitive deficit. Cognitive domains are described as they relate to communication rather than separated as they are in many other publications where they are treated as independent behaviors. A separate section on normal processing includes five chapters providing a strong foundation for understanding the factors that contribute to disordered communication and its management. The evidence-based approach promotes best practices for the most effective management of patients with cognitive-communication disorders. Coverage of the cognitive aspects of communication helps you meet the standards for certification in speech-language pathology. A strong author team includes two lead authors who are well known and highly respected in the academic community, along with expert contributors, ensuring a comprehensive, advanced clinical text/reference.

This is a bright and bold sticker book of first words. It encourages children to choose the right sticker to go on each page in a fun approach to the early acquistion of vocabulary. The book contains colourful images of everyday objects, designed to promote a child's awareness of its environment.

This a Full list of our latest courses and Publications at BEST price for my students! Please check and Enjoy your study. We provide Contents, Online System and Live Teaching Online !
