Apollo 14. In the Apollo 14 patch, the object heading from Earth to the Moon is an astronaut pin. Astronauts were given a silver version of this pin when they were accepted into the astronaut corps and a gold one after their first space flight. As a joke, the backup crew for Apollo 14 also designed their own patch.

Space Patches – Astronomy Now Shop

A mission patch is a cloth reproduction of a spaceflight mission emblem worn by astronauts and other personnel affiliated with that mission. It is usually executed as an embroidered patch. The term space patch is mostly applied to an emblem designed for a manned space mission.

Mission patch - Wikipedia

Lion Brothers was never utilized by NASA for mission patches, though contractors apparently procured patches from them. A standing contract was executed between NASA and AB Emblem in February 1970, and all mission patches from that time through the end of the Skylab program

Space Mission Patches - About Patches

At the other end of the cost spectrum, NASA astronauts have over time been allowed to carry a few mission patches each on their various space flights. These so-called flown patches, where the provenance can be verified, fetch significant sums - obviously the more famous the mission, the more valuable the item.

OASI: Mission Patches

patches that actually look like the patches the astronauts used. The actual embroidered patches used by the astronauts were usually around 4" in size; only souvenir patches were created in the smaller 3" size (3" patches are not treated in these pages). Even so, most 4" patches for flights prior to Apollo 11 were
