A practical look at extending the value of Building Information Modeling (BIM) into facility management—from the world's largest international association for professional facility managers Building owners and facility managers are discovering that Building Information Modeling (BIM) models of buildings are deep reservoirs of information that can provide valuable spatial and mechanical details on every aspect of a property. When used appropriately, this data can improve performance and save time, effort, and money in running and maintaining the building during its life cycle. It can also provide information for future modifications. For instance, a BIM could reveal everything from the manufacturer of a light fixture to its energy usage to

maintenanceinstructions. BIM for Facility Managers explains how BIM can be linkedto facility management (FM) systems to achieve very significantlife-cycle advantages. It presents guidelines for using BIM in FMthat have been developed by public and private owners such as theGSA. There is an extensive discussion of the legal and contractualissues involved in BIM/FM integration. It describes how COBie canbe used to name, capture, and communicate FM-related data todownstream systems. There is also extensive discussion ofcommercial software tools that can be used to facilitate thisintegration. This book features six in-depth case studies that illustrate howBIM has been successfully integrated with facility management inreal-life projects at: Texas A&M Health Science Center USC School of Cinematic Arts MathWork's new campus Xavier University State of Wisconsin Facilities University
