Exercise 4 Review Sheet The Cell Anatomy Division ...

The cell is the most basic unit of structure and function in all living organisms. Modern cell theorists assert that all functions essential to life occur within the cell; and that, during cell division, the cell contains and transmits to the next generation the information necessary to conduct and regulate cell functioning.

If a cell undergoes mitosis but not cytokinesis, the product is \_\_5\_\_. The structure that acts as a scaffolding for chromosomal attachment and movement is called the \_\_6\_\_. \_\_7\_\_ is the period of cell life when the cell is not involved in division. Two cell populations in the body that do not routinely undergo cell division are \_\_8\_\_ and \_\_9\_\_.
