was recorded. The data was published in the following monograph: Chen, J., Campbell, T.C., Li, J., Peto, R. Diet, Lifestyle and Mortality in China. A Study of the Characteristics of 65 Chinese Counties.

The China Study - T. Colin Campbell Center for Nutrition ...

In the book, The China Study, data is presented that suggests strong relations exist between what we normally eat in the U.S. and the occurrence of these diseases. Even without stating the same thing about the U.S. diet, some physicians suggest that patients with these problems cut back on the volume of food intake, get more exercise , avoid high cholesterol -containing foods, reduce salt intake, and eat more fiber .

The China Study - Wikipedia

The China Study involved 367 variables and 8,000 correlations. I said I would leave it to others to comment on the study design and the statistical analysis, and now someone has done just that . Denise Minger devoted a month and a half to examining the raw data to see how closely Campbell's claims aligned with the data he drew from; she found many weaknesses and errors.
