In 1912, Casimir Funk originally coined the term "vitamine". The major period of discovery began in the early nineteenth century and ended at the mid-twentieth century. The puzzle of each vitamin was solved through the work and contributions of epidemiologists, physicians, physiologists, and chemists. Rather than a mythical story of crowning scientific breakthroughs, the reality was a slow, stepwise progress that included setbacks, contradictions, refutations, and some chicanery.

An original history of man's greatest adventure: his search to discover the world around him. In the compendious history, Boorstin not only traces man's insatiable need to know, but also the obstacles to discovery and the illusion that knowledge can also put in our way. Covering time, the earth and the seas, nature and society, he gathers and analyzes stories of the man's profound quest to understand his world and the cosmos.

By piecing the lives of selected individuals into a grand mosaic, Pulitzer Prize-winning historian Daniel J. Boorstin explores the development of artistic innovation over 3,000 years. A hugely ambitious chronicle of the arts that Boorstin delivers with the scope that made his Discoverers a national bestseller. Even as he tells the stories of such individual creators as Homer, Joyce, Giotto, Picasso, Handel, Wagner, and Virginia Woolf, Boorstin assembles them into a grand mosaic of aesthetic and intellectual invention. In the process he tells us not only how great art (and great architecture and philosophy) is created, but where it comes from and how it has shaped and mirrored societies from Vedic India to the twentieth-century United States.
