It covers crafting a story, cinetech, animation, and the dynamics of making your vision come to life. Become a filmmaker and learn about directing with this clever and thorough guide.

Introduce kids to stop-motion animation and animated filmmaking. Animation is everywhere—from movies and TV to apps and video games--and today's tech-savvy kids know all about it. With the accessibility and ease of use of cameras and video-editing software, people of all ages are learning how to make stop-motion animation. In "Animation Lab for Kids," artists, teachers, and authors Laura Belmont and Emily Brink present exciting, fun, hands-on projects that teach kids a range of animation techniques. From the classic zoetrope, flip book, and cel methods (which don't require any devices or technology) to different methods of shooting, the lessons require no previous experience for either child or adult. Experimenting with a variety of art materials (drawing, clay, and paper cut-outs), young animators will learn to plan a film through writing, storyboarding, and creating sets. The book also features helpful and informative sidebars on the history of the early animation techniques as well as the inspiring work of innovative and influential animators, including Kirsten Lepore, PES, Hailey Morris, and William Kentridge. The authors are co-founders and lead teachers of The Good School, an arts-education school that cultivates and combines traditional art-making skills and the technologies involved in stop-motion animation filmmaking. They teach animation techniques at camps, schools, and events, including the New York International Children's Film Festival.

Packed with step-by-step tutorials and inside tips and advice from professional animators, Stop-motion Animation is the ultimate handbook for anyone seeking to explore the exciting possibilities afforded by stopmotion animation. With its highly accessible approach and use of inspirational, bang up-to-date examples, the book is guaranteed to appeal to a hip new generation of recreational animators, as well as artists, photographers, and creatives of all stripes seeking new outlets for their creativity. Combining a winning formula of practical instruction and creative inspiration, Stop-motion Animation examines a wide range of stop-motion techniques, covering traditional forms such as claymation and cut-out animation, as well as innovative new techniques that use everyday items such as Lego and post-it notes. Engaging interview-style case studies explore the work of some of today ' s most exciting stop-motion practitioners, providing readers with an invaluable insight into their working processes, while detailed tutorials illustrate a range of both basic and more advanced techniques, from making a basic puppet to shooting with an iPhone. QR codes (readable from any smartphone) accompany each tutorial, linking directly to online videos which reveal the finished piece of animation, as well as to videos of digital tutorials which provide a moving screen capture. Readers will also learn easy post-production techniques for editing files and creating animated movies on both Macs and PCs.

Do you love stop-motion animation? Try shooting a stop-motion video yourself! Learn how to plan, cast, shoot, and edit an stop-motion video. Capstone 4D videos provide extra content to help guide you on your film-making journey. It's time to put your creativity to the test. And action!

Step-by-step instructions show how to build detailed LEGO models of neighborhoods - complete with homes, stores, restaurants, barbershops, and more. Enter the fantastical world of model building.
