To be fair, I didn't enjoy Book 8 quite as much because of how he chose to incorporate different characters. BUT, part of a good series is doing the unexpected and not staying on the typical story arc. So, Terra Gambit gets 5 stars because Empire of Bones is a 15 star series.

Terran Gambit is everything I want a great Sci-fi book to be. It's fast paced, action packed and I could hardly put it down. After the first couple of pages, you're hooked and the author, Endi Webb tells a superb tale with just the right amount of dialogue. I literally couldn't turn the pages fast enough and can't wait for book #2 in the series.

The bad news is that Jedao went mad in his first life and massacred two armies, one of them his own. Mycroft Canner is a convict. For his crimes he is required, as is the custom of the 25th century, to wander the world being as useful as he can to all he meets. Carlyle Foster is a sensayer—a spiritual counselor in a world that has outlawed the public practice of religion, but which also knows that the inner lives of humans cannot be wished away. The world into which Mycroft and Carlyle have been born is as strange to our 21st-century eyes as ours would be to a native of the 1500s. It is a hard-won utopia built on technologically-generated abundance, and also on complex and mandatory systems of labelling all public writing and speech. What seem to us normal gender distinctions are now distinctly taboo in most social situations. And most of the world's population is affiliated with globe-girdling clans of the like-minded, whose endless economic and cultural compenion is carefully managed by central planners of inestimable subtlety. To us it seems like a mad combination of heaven and hell. To them, it seems like normal life. And in this world, Mycroft and Carlyle have stumbled on the wild card that may destabilize the system: the boy Bridger, who can effortlessly make his wishes come true. Who can, it would seem, bring inanimate objects to life...

Fifty thousand years ago, the Precursors broke the universe Now great powers and small alike fight over their wreckage But in the midst of the chaos, there is a question no one asks... Why? Morgan Casimir, commander of the AITol Imperial cruiser Defiant, has seen the works of the Precursor aliens known as the Alava. She has seen their accidents threaten worlds and consume entire star fleets. Charged by her Empress to prevent a conspiracy of profiteers from finding and using a lost fleet of Alava warships, she knows unimaginable catastrophe looms if she fails. With her lover, xenarcheologist Dr. Rin Dunst, at her side, she is sent to a hot zone on the edge of war to once again achieve the impossible. But as they search along a border flaring in violence, Morgan discovers that if the worst comes to pass, her orders are to destroy the ships rather than allow them to be taken...and she realizes that there just might be a reason seemingly godlike aliens lost an entire fleet.

The war in Anis is over. The Lord of Fate has usurped the heavenly throne in the absence of the Creator, and the last of the Rebellion ' s survivors flee to the human world of Evanna in hiding. When the last bastion of resistance is burned to the ground, only a boy and an old man remain. Years pass, and the two survivors have accepted a life of peace in their exile. Until a goddess falls from the sky. Having been held captive for millennia in Fate ' s dungeon, the Lady of the Wind has made her escape and seeks solace with the last embers of the rebellion. But those that hunt her are not far behind. The forces of Heaven will not allow the flame of rebellion to reignite, as Fate ' s vision of a perfect world is close at hand. The boy, the old man, and the goddess now face impossible odds and hard choices as their enemies gather and begin to circle. Lords and Ladies, swords and arrows, love and hope all have a part to play all while the fate of all the worlds hang in the balance.

The inspiration for Chlo é Zhao's 2020 Golden Lion award-winning film starring Frances McDormand, "People who thought the 2008 financial collapse was over a long time ago need to meet the people. Jessica Bruder got to know in this scorching, beautifully written, vivid, disturbing (and occasionally wryly funny) book." —Rebecca Solnit From the best fields of North Dakota to the campgrounds of California to Amazon ' s CamperForce program in Texas, employers have discovered a new, low-cost labor pool, made up largely of transient older adults. These invisible casualties of the Great Recession have taken to the road by the tens of thousands in RVs and modified vans, forming a growing community of nomads. Nomadland tells a revelatory tale of the dark underbelly of the American economy—one which foreshadows the precarious future that may await many more of us. At the same time, it celebrates the exceptional resilience and creativity of these Americans who have given up ordinary rootedness to survive, but have not given up hope.

The " beautiful " novel that inspired the film starring David Bowie, from a Nebula Award finalist (The New York Times), The Man Who Fell to Earth tells the story of Thomas Jerome Newton, an alien disguised as a human who comes to Earth on a mission to save his people. Devastated by nuclear war, his home planet, Anthea, is no longer habitable. Newton lands in Kentucky and starts patenting Anthean technology—amassing the fortune he needs to build a spaceship that will bring the last three hundred Anthean survivors to Earth. But instead of the help he seeks, he finds only self-destruction, sinking into alcoholism and abandoning his spaceship, in this poignant story about the human condition by the acclaimed author of Mockingbird. " Beautiful science fiction ... The story of an extraterrestrial visitor from another planet is designed mainly to say something about life on this one. " —The New York Times " An utterly realistic novel about an alien human on Earth ... Realistic enough to become a metaphor for something inside us all, some existential loneliness. " —Norman Spinrad, author of The Iron Dream " Those who know The Man Who Fell to Earth only from the film version are missing something. This is one of the finest science fiction novels of its period. " —J. R. Dunn, author of This Side of Judgment
