It describes and illustrates the results of more than fifteen years of elegant experimental studies conducted by the author. In his investigations, Thomas Seeley has sought the answer to the question of how a colony of bees is organized to gather its resources. The results of his research--including studies of the shaking signal, tremble dance, and waggle dance, and other, more subtle means by which information is exchanged among bees--offer the clearest, most detailed picture available of ...

Pappus on the wisdom of bees. What follows is the preface to Pappus 's work on isoperimetry. Zenodorus had earlier written a treatise on isoperimetry. The theorems which follow this preface attempt to prove that of all solid figures with a fixed surface area, the sphere has the greatest volume. Not surprisingly Pappus cannot achieve his aim but he does prove that the volume of the sphere is greater than that of
