Prospectus. This announcement comes after top U.S. intelligence and military officials ...

In 1969 the U.S. Air Force issued a statement that read , “ No UFO reported, investigated and evaluated by the Air Force was ever an indication of threat to our national security. ” This statement is patently false. It has been proven untrue by the testimony of many military officers and airmen and documentation of incidents involving UFOs and nuclear weapons, testimonies of which the U.S. Air Force was fully aware. Unidentified details many of these testimonies, some for the first time. As partial justification for its position, the Air Force cites a University of Colorado study that was contracted and paid for by federal funds. Unidentified reveals how this study was actually just another part of the plan to cover up the reality of the UFO phenomenon. For the first time, Unidentified publishes evidence that the investigators for the Colorado study knew about the UFO-related missile shutdown incidents but did not investigate them or include them in their final report.

In four separate Gallup polls in the years between 1966 and 1987, an average of 52% of Americans believe the UFO phenomenon is real. Unidentified explores this phenomenon with the available evidence covering a sixty-year period. The author, Robert Salas writes about his own experience involving the disabling of nuclear missiles under his control, during a UFO encounter. Another, similar incident occurred within a week. The U.S. Air Force denied the involvement of UFOs in these incidents. Salas presents evidence that this denial and cover-up resulted in withholding evidence from the Air Force funded, Condon investigation into the UFO phenomenon. The intentional “ white-wash ” of the evidence resulted in the current Air Force policy of public denial, dismissal and lies about the UFO phenomenon. Unidentified reveals previously unreported UFO incidents through witnesses who are disclosing their stories publicly for the first time. These stories are also UFO incidents involving U.S. nuclear weapons bases. The combined related incidents clearly indicate a pattern of interest by UFOs with our nuclear weapons. The response of the U.S. Government to this phenomenon has been extreme secrecy, dis-information and ridicule. Unidentified shines a new light on the extremes of government in dealing with this phenomenon.

complicating the identification of the unidentified flying object. The phenomenon is examined from a historical perspective, tracing their interaction with the development in our civilization and culture. The startling conclusion addresses the issue of what their presence means in light of the new millennium and how their appearance in ancient history has been a harbinger of major change and upheaval on the earth. A UFO report form is provided by the author in the appendix at the end of the book. A continued study of and investigation into the UFO phenomenon is encouraged. This book includes common modalities that the reader can access to conduct their own continuing investigations.

Asked where he got the ideas for his stories, Stephen King replied, "My mother would read me FATE magazine—which was about the paranormal, flying saucers, and all that stuff. ...and I was fascinated." Now you can read The Best of FATE. UFOs and Close Encounters brings you the story of Unidentified Flying Objects through key reports—from the encounter that started it all in 1948 to 21st century sightings worldwide—selected from the magazine's over 700 issues. Harder, professor of engineering at the UC Berkely's metallurgical analysis of UFO remains, he says proves they are of extraterrestrial origin. Cambridge historian Harold T. Wilkins discusses findings from his survey of 1,000 years of UFO sightings. Utah State University professor Frank B. Salisbury, PhD, meditates on whether science alone is adequate to explain their existence. Renowned UFOlogist Jaques Vallee shares possible extradimensional, psychic or spiritual explanations. *Includes pictures *Includes accounts of purported UFO sightings and Roswell *Includes online resources and a bibliography for further reading *Includes a table of contents "The point is that the idea of space vehicles shaped like flying saucers was imprinted in the national psyche for many years prior to 1947, when the Roswell incident took place. It didn't take much stretching for the first observers of UFOs to assume that the unknown objects hovering in the sky had the same disk shape as the science fictional vehicles." - Frank Wu, illustrator for science fiction magazines When people think about unidentified flying objects (UFOs), they tend to think of flying discs piloted by gray beings with large heads and enormous eyes. They tend to think that these sightings only started relatively recently and that belief in UFOs is some sort of modern religion brought on, perhaps, by the very justifiable fears of a nuclear age. But a study of the phenomenon quickly reveals that humanity has been seeing UFOs since the beginning of recorded history and perhaps a lot longer than that. Modern Ufology focuses on mysterious lights on Ceres or tales of alien abduction, but this wasn't always the case. Looking at how belief in the UFO phenomenon has changed and how it has stayed the same sheds new light on how culture and belief changes over time. You don't have to believe humans are actually being visited by aliens from another planet to recognize the importance of UFOs in human society. Any widespread belief that endures for centuries is worthy of study, and as always, cases exist that can't be explained away as simple "belief" ... Everyone is familiar with theories about UFOs, or "flying saucers" as they were often called then, but even this name dates back only to 1947. Before that time, they were called "ghost rockets" or "ghost airplanes" or "ghost airships." Before the age of flight, the flying objects were called various things such as "flying chariots." No matter what terminology is used, every generation has clearly had its own belief that mankind is not alone. For example, few things in American history are as controversial as the Roswell Crash. The one undeniable fact is that something happened near Roswell, New

Mexico, in 1947, but beyond that, the facts become murky as memories and evidence lose their luster over the years. That said, the impact of an unidentified object continues to mystify residents, visitors and the curious, and it has not only put Roswell on the map but has kept it there for thousands of tourists. Nonetheless, skepticism about the official version of the incident prevails, and a countless number of people continue to believe the American government covered up a crash landing by aliens. As John B. Alexander, Ph. D., a former project manager at the Los Alamos National Laboratory and consultant to the CIA, put it, "Attempting to come to any complete resolution of the incident is a fool's errand, as whatever the truth may have been has become so distorted over time that facts have merged inextricably with fiction." *Flying Saucers: The Mysterious History of the UFO Phenomenon* looks at the unidentified flying object craze. Along with pictures of important people, places, and events, you will learn about flying saucers like never before, in no time at all.

Two of our country's most eminent scientists, both of whom have studied the UFO phenomenon for decades, have collaborated on this report of what serious scientists now believe about it. And they show that an increasing number of scientists are taking the UFO subject seriously. From the outset, Hynek and Vallee make their position clear: UFOs represent an unknown but real phenomenon. The far-reaching implications take us to the very edge of what we consider the known and real in our physical environment. Perhaps, say the authors, UFOs signal the existence of a domain of nature as yet totally unexplored. In this mind-stretching book, the authors sample UFO reports-including those allegedly involving humanoids-and describe the patterns that have been perceived in the behavior of the phenomenon. They also establish a framework for the further study of the UFO phenomenon. Where might such study lead? What can be studied, and how? What is the real nature of the UFO phenomenon? Does it originate with the actions of other intelligences in the universe? Does the UFO phenomenon have a purely physical explanation, or is there a vaster, hidden realm that holds the solution? J. Allen Hynek is Professor of Astronomy at Northwestern University. For years, he was astronomical consultant to the U.S. Air Force. Over the years, as Dr. Hynek focused on the UFO reports that appeared unsolvable, he began to believe that there is something most unusual going on. Jacques Vallee is the author of several classic UFO books. After obtaining his doctorate in computer sciences from Northwestern University, he joined the Computer Laboratory at Stanford University.
