YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH!" The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN YIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

"Connecting to Our Ancestral Past invites readers to find their place in the world through acknowledgment of what came before, to connect to their ancestral lineage and clear unresolved energetic entanglements that may prevent them from having a full and happy life"--Provided by publisher.

'Oh prams on concrete balconies, what will your children see? Oh white and antiseptic life in school and home and clinic, oh soul-destroying job with handy pension, oh loveless life of safe monotony, why were you created?' First and Last Loves is a collection of Betjeman's essays on architecture, first published to coincide with an exhibition at the Soane Museum, and a worthwhile volume in its own right. Introduced with a lively tirade against mediocrity entitled 'Love is Dead', Betjeman discusses a range of topics including conservation battles, modern architecture and his passion for railways.

" Fat with meaning . . . tastes oh so sinfully good. " ---Washington Post Book World Ever since the publication of Cowboys Are My Weakness, Pam Houston's fans have clamored for more from the woman with a penchant for the laconic men of the West. Now, in eleven linked fictions featuring a peripatetic photographer named Lucy O'Rourke, Houston serves up once more her charismatic blend of relationships and adventure. This is the story of one woman's struggle for balance in a world that keeps pitching and rolling under her feet. Dislocated geographically and spiritually, Lucy is prone to the wrong decisions at all the critical times; what's more, natural disasters just seem to find her: an accident on a rafting trip in Cataract Canyon, a grand cayman attack in the Amazon, a hurricane in the Gulf Stream--not to mention a few natural disasters in the form of men. A surprise encounter with Carlos Casterada convinces her that she isn't living the right life, and his cryptic message sends her back to her beloved Rocky Mountains. There, on a ranch, she takes comfort in animals, the jagged landscape of Colorado, and the sage advice of women friends; she even gives a man a try. Most important, for the first time she reconnects with parts of herself she didn't remember losing. "Pam Houston taps into our souls," one reader has said. "She could write my diary better than I can."

"CME Project is a four-year, NSF-funded, comprehensive high school mathematics program that is problem-based, student-centered, and organized around the familiar themes of Algebra 1, Geometry, Algebra 2, and Precalculus."--Publisher's website.

Acclaimed for her "devastatingly accurate insight" (The New York Times Book Review) into the criminal mind, Ann Rule has chronicled the most fascinating cases of our time in her bestselling Crime Files series. For this sixth stunning collection, Rule has culled from her private files the most-asked-about homicide cases -- riveting accounts of seemingly normal men and women who are compelled d by a murderous rage to suddenly lash out at innocent victims. Torn from the headlines, here is the case that shocked a nation: the Seattle city bus ride that turned to mayhem and murder at the hands of a gunman. Ann Rule unmarks the forces that drove quiet, clean-cut Silas Cool to shoot the driver, causing the bus to plunge off the Aurora Bridge into an apartment building. The catastrophe left three dead -- including Cool -- and dozens injured. While the scene unfolds as in a terrifying movie, Rule finds very real answers to the haunting question "how could this happen?" -- and expertly constructs the unseen chain of events that resulted in an explosive and shattering tragedy. Included here are nine other sensational cases that illuminate Rule's unique and authoritative view of the human psyche gone temporarily berserk. No one can match Rule's meticulous research, or reveal the motives to murder in such explicit and chilling detail. You may think you know who is safe and who is dangerous; in A Rage to Kill, Ann Rule frighteningly shows that none of us are truly protected from the flashes of irrational violence that can erupt from the killers among us.

An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to "users" of mathematics. A brief and elementary introduction to differentiable manifolds is given so that the main theorem, namely Stokes' theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern's proof of the Gauss-Bonnet theorem for compact surfaces.

With three months remaining of her marriage of convenience, Savannah is ready to say goodbye to her spoiled rich boy of a husband. He's annoying and argumentative and used to always getting his way. Sure, he's hot. And maybe occasionally a little bit sweet. But she doesn't want to stay married to him. Not at all. He needed a wife for a year so he could inherit his grandmother's fortune, and she needed to pay off her family's debts. That's all their marriage has ever been about. So she really needs to stop falling into bed with him.

What happens when a seventeenth-century bad guy has twenty-first-century technology? An accident with an antigravity machine catapulted Peter Schock and Kate Dyer back to 1763. A bungled rescue attempt leaves Peter stranded in the eighteenth century while a terrifying villain, the Tar Man, takes his place and explodes onto twenty-first-century London. Concerned about the potentially catastrophic effects of time travel, the NASA scientists responsible for the situation question whether it is right to rescue Peter. Kate decides to take matters into her own hands, but things don't go as planned. Soon the physical effects of time travel begin to have a disturbing effect on her. Meanwhile, in our century, the Tar Man wreaks havoc in a city whose police force is powerless to stop him.Set against a backdrop of contemporary London and revolutionary France, The Time Thief is the sequel to the acclaimed The Time Travelers.
