The best handbook on chart usage, from one of the most trusted names in boating In 2000, the U.S. government ceased publication of Chart No. 1, the invaluable little book that generations of mariners have consulted to make sense of the complex system of signs, symbols, and graphic elements used in nautical charts. Now Chart No. 1 is not just reborn but expanded and improved in *How to Read a Nautical Chart*. The demand for a book like this has never been greater. Arranged and edited by Nigel Calder, one of today's most respected boating authors, --and

Nigel and his partner Terrie were young and foolish, with a home-built boat that was new and untested, one child already and another on the way - but they were determined to complete an adventurous 18-month voyage from New Orleans to Venezuela and back. It was the voyage that made Calder the yachtsman he is today, a marvellous romp through the West Indies, seeing an unspoilt Caribbean, while learning hard-won lessons from direct experience - troubleshooting engines, kedging off shoals and reefs, and most importantly navigating Nada, a yacht that quickly became very much part of the
